

MAINE DEPARTMENT OF ENVIRONMENTAL PROTECTION  
**Monthly Statistical Inventory Reconciliation Vendors**

Statistical Inventory Reconciliation (SIR) is a US EPA approved leak detection method used to monthly check single-walled underground oil storage tanks (UST) for leaks. Facility owners conduct monthly SIR's for each of their UST's that are used to store motor fuel (gasoline, diesel, or aviation fuel) or that store any petroleum product for marketing and distribution.

Cost will depend on the number of tanks for which data is submitted for analysis. Contact a SIR Vendor to determine their data submission requirements. Be sure to tell your selected vendor that the monthly SIR must meet the 0.2 gallon-per-hour (gph) leak test standard.

The following eight companies can provide SIR service to Maine UST facilities:

**Advanced Petroleum Services, Inc.**

Attn: Kurt Kraus  
P O Box 1330  
Corbin, KY 40702  
(888) 747-8423

**ATC Eclipse**

Attn: Megan Kazmierczak  
705 A Lakeview Plaza Blvd.  
Worthington, OH 43085  
(614) 433-0170

**Crompco, LLC**

Attn: Jennifer Foster  
1815 Gallagher Road  
Plymouth Meeting,, PA 19462  
(800) 646-3161

**ES&H Compliance, Inc.**

Attn: Katie Bepko  
1795 Boston Post Road, Suite 4B  
Guilford, CT 03437  
(800) 374-7471

**Simmons Sirvey Corp.**

Attn: Data Entry  
106 East Main Street  
Richardson, TX 75081  
(800) 848-8378

**Tanknetics SIR, Ltd.**

Attn: James Ray  
P.O. # 513  
Slippery Rock, PA 16057  
(800) 520-4802, ext. 106

**USTMAN Industries, Inc.**

Attn: Mailstop F-26  
7300 W. Friendly Ave.  
Greensboro, NC 27420-2087  
(800) 253-8054  
Contact: James Ofenga

**Warren Rogers**

Attn: Sue Carrier  
747 Aquidneck Avenue,  
Middletown, RI 02842  
(800) 972-7472  
[info@warrenrogers.com](mailto:info@warrenrogers.com)

For addition SIR vendors see:

[www.nwglde.org/methods/sir\\_quantitative.html](http://www.nwglde.org/methods/sir_quantitative.html)

At the end of each month, your selected SIR vendor will generate an SIR report from your inventory data. If the SIR report is passing, you need only file the report. If the report fails by indicating a potential leak of 0.2 gph or more, this is evidence of a possible leak that must be reported to the DEP within 24 hours. If the report is inconclusive (usually due to poor data quality), you must also report this non-passing test to the DEP.

**During normal business hours, report evidence of a possible leak  
to DEP's Underground Tanks Unit at (207) 287-7688.**

**After normal business hours, call the 24-hour Spill Hotline at  
1-800-482-0777**
