## INSTRUCTIONS FOR COLLECTING COMPLIANCE WATER SAMPLES FOR **Carbamates**

CARBAM 531

## (All 3 vials are to be collected at the same point and following the steps below)

- 1. Collect sample at the sample point preprinted on the sample form.
- 2. Remove any screen, hoses and aerators from end of faucet.
- 3. Run COLD water for 3 to 5 minutes to make sure water has not been sitting for a long time in pipes or tanks and is fresh from the well.
- 4. Turn water down so it does not splash.
- 5. <u>Caution!!!</u> "Empty" sample vials contain a special preservative (monochloroacetic acid) that may irritate skin. Open slowly and carefully. <u>Do not rinse bottle.</u>
- 6. Remove container cap. Do not allow inside of cap, inside of bottle, or bottle threads to be touched by any object.
- 7. Add one tablet of dechlorinating agent to each vial.
- 8. Fill vials carefully until water is to shoulder of vial.
- 9. Screw cap on securely and shake vial to dissolve tablet.
- 10. Freeze cool-pack and replace in shipping container just prior to shipping.
- 11. Fill out the required information on sample form. **SIGN THE FORM!** The sample will not be processed unless the form has a signature!
- 12. Return vials with completed paperwork to lab. SAMPLE MUST ARRIVE AT LAB WITHIN 7 DAYS OF COLLECTION! If not mailed directly after sample collection, store samples at 4°C.

IF YOU HAVE ANY QUESTIONS....PLEASE CALL THE MAINE DRINKING WATER PROGRAM AT (207) 287-2070 OR YOUR LABORATORY
