

# ImmPact Blood Lead Module – Quick Reference Guide

## How to Use the Module for Children Ages 1 and 2 Years

- The Blood Lead Test Requirements and Recommendations table indicates when tests are due and the status of the test. Providers can enter limited information for patients in this table.
- If a guardian refuses the blood test, use the drop-down list under the Lead Test column to record the refusal.
- If a blood test is to be conducted at another location and the test has been ordered, record the Test Order date in the Test Ordered column.
- ImmPact will automatically complete all other fields.

Age	Guidelines*	Date Due	Risk Assessment Done	Lead Test	Test Ordered	Date of Test	Status
1 year	<a href="#">Test Required</a>	02/18/2019	NA	Test Required ▼	02/13/2019	<a href="#">02/18/2019</a>	Completed
2 years	<a href="#">Test Required</a>	02/18/2020	NA	Test Required ▼			Due
3 years	<a href="#">Risk Assessment</a>	02/18/2021					Not Due
4 years	<a href="#">Risk Assessment</a>	02/18/2022					Not Due
5 years	<a href="#">Risk Assessment</a>	02/18/2023					Not Due

\*Note: For schedule of routine screening and testing. For prior blood lead tests greater than or equal to 5 µg/dL see Action column below or review [Maine CDC Guidelines](#)

## How to Use the Module for Children Ages 3 through 5 Years

- For older children, a risk assessment is recommended.
- If a risk assessment is completed, use the drop-down menu to select ‘Yes’. If a risk assessment is not completed, select ‘No’.
- The result of the Risk Assessment will determine if a blood test is needed. Use the drop-down menu under Lead Test to record ‘Yes’, ‘No’, or ‘Test Refused’.
- If a test has been ordered at another facility, enter the order date in the Test Ordered field.
- ImmPact will automatically complete all other fields.
