

# ImmPact Blood Lead Module Read-Only Access Training

Childhood Lead Poisoning Prevention Unit  
Maine Center for Disease Control and Prevention

# Training Topics

- Brief Refresher on Lead Poisoning
  - Health Effects, Children at Risk, Maine CDC Interventions
- Maine's New Blood Lead Testing Laws
- Role of the Provider
- Using the Blood Lead Module in ImmPact, *including how to:*
  - Access patient demographic information and the module
  - Review blood lead testing requirements and recommendations
  - Review blood lead history and individual test results
  - Enter information about tests ordered by your office
  - Run reports to identify patients in need of testing

# Health Effects of Lead in Children

- Even low blood levels of lead place children at risk for adverse health effects.

- In 2018, an estimated 350 Maine children under age 6 had blood lead levels above 5  $\mu\text{g}/\text{dL}$ .

# Health Effects of Lead in Children

While rare, at higher blood levels of lead, children are at risk for additional health effects, including seizures, coma and death at very high levels.

# Which Children are at Risk for Lead Poisoning?

Children living in homes built before 1950 are at highest risk for lead exposure. Deteriorated lead paint and resulting lead dust pose the greatest risk, but even intact paint may be a risk for some children.

# Other Risk Factors for Lead Poisoning

- Children whose parents work in lead related industries are at risk from “take home” lead.
- Lead from plumbing sources may contaminate drinking water.
- Some cultural or dietary practices may expose children to lead.

# DHHS Provides Services Based on “Confirmed” Blood Leads $\geq 5$ mcg/dL

- Children may be screened for lead poisoning with either a capillary or a venous blood test.
- Capillary tests are more likely than venous tests to be contaminated from lead on the child’s skin or from the testing environment.
- An elevated capillary test must be confirmed with a venous blood lead test to determine if a child actually has lead poisoning.

# When a Lead Poisoned Child is Identified, DHHS Inspects Dwellings for Hazards

Test for lead in  
paint, dust, water,  
soil

# If inspections find lead hazards, DHHS must:

## Notice of Language Access

This poster is a notice of environmental lead hazards. For help reading or understanding the information on this poster, please call 207-287-4311 and we will provide a free interpreter. This building contains lead hazards which are unsafe for children. This notice may not be removed until the Department of Health and Human Services states the hazards no longer exist. (English)

هذا القلمون هو إخطار بمخاطر الرصاص البيئية للبناء في قرابة في هذه المعلومات الموجودة على هذا القلمون، يرجى الاتصال على الرقم 207-287-4311 ورسولنا من أجل معرفة المزيد من التفاصيل بشأن هذا القلمون. لا يجوز إزالة هذا القلمون حتى تقرر وزارة الصحة والخدمات الإنسانية في ولاية مين.

Cette affiche est un avis sur les risques d'exposition au plomb dans l'environnement. Pour obtenir de l'aide pour lire ou comprendre les renseignements figurant sur cette affiche, veuillez appeler le 207-287-4311, et nous vous fournirons un service d'interprétation gratuit. Ce bâtiment présente des risques d'exposition au plomb qui sont dangereux pour les enfants. Ce avis ne peut être retiré sans que le Département de la santé et des services sociaux (DHSS) déclare que ces risques n'existent plus. (French)

Relocate family if needed

Order removal of lead hazards

# Universal Blood Lead Testing Mandate 2019

Recognizing the importance of identifying children with lead poisoning in order to provide them with DHHS services to reduce their lead exposure, in 2019, the Maine State Legislature **mandated that health care providers test all 1- and 2-year-olds for lead poisoning.**

APPROVED

JUNE 27, 2019

BY GOVERNOR

CHAPTER

479

PUBLIC LAW

# Role of Providers

- Test all 1- and 2-year-olds for blood lead.
- Follow Maine CDC guidelines for testing at 3, 4, and 5 years.
- Confirm elevated capillary results.
- Follow-up elevated venous results to make certain DHHS actions have been successful in reducing blood lead levels.

# For More Information about Blood Lead Testing and DHHS Services for Lead Poisoned Children

**Requirements and Recommendations:**

- 1 and 2 year old's: tests are required under Maine law.
- The module displays the date the test is due
- Under Lead Test there is an option to record Test Refused if parent refuses a test.
- If a test has been ordered at a lab, you can enter the date.
- Date of Test and Status are automatic.
- 3-5 year old's: a risk assessment is recommended to determine if testing is needed.
- Record if risk assessment is done and if testing is needed

### ImmPact Provider Notes

Created By	Create Date	Note
Linne, Stephen	02/20/2020 10:49 AM	The value of Blood Lead Level was changed from 4.5 to 8.3

- ### More on Blood Lead History
- Daily, Maine CDC uploads all venous blood lead tests and capillary tests analyzed at Maine Health and Environmental Testing Lab
  - You cannot enter test results unless your organization is approved for in-office testing.
  - Providers who perform in-office capillary testing must enter results into ImmPact within 48 hours of test.
  - Only Maine CDC staff can change blood lead test results once they are saved in ImmPact.

## Maximum Age Exceeded List Report

### Select a Report

- No One Year Old Test
- No Two Year Old Test by Three Years of Age
- No Test by Two Years of Age
- No Test by Three Years of Age
- Only One Test by Three Years of Age (At Any Age)
- Only a One or Two Year Old Test by Three Years of Age (Not Both)

### Select Date

*Note: If Date is blank, today's date will be used.*

The list reports will be populated with ImmPact data according to the selected criteria and time frame up to the date selected. The user may select a previous date if desired. Results are sorted in a chronological order by date of birth, with the oldest child first. In rare instances, a child's record may require manual review by the Maine CDC before it is matched into ImmPact and may be included on one of the reports as not being tested.

Age Exceeded Report has a number of options. To obtain explanation of each report, hover the mouse over the radio button of the report you are interested in (see next slide) or click on the light bulb.

Select the report you are interested in and the date that you want the report run for.

Select Generate

### Maximum Age Exceeded List Report

#### Select a Report

- No One Year Old Test
- Reached 18 months of age and has not been tested between 9 months and before 18 months of age.
- No Test by Two Years of Age
- No Test by Three Years of Age
- Only One Test by Three Years of Age (At Any Age)
- Only a One or Two Year Old Test by Three Years of Age (Not Both)

Hover the mouse over the radio button and an explanation of the report will appear.

#### Select Date

*Note: If Date is blank, today's date will be used.*

The list reports will be populated with ImmPact data according to the selected criteria and time frame up to the date selected. The user may select a previous date if desired. Results are sorted in a chronological order by date of birth, with the oldest child first. In rare instances, a child's record may require manual review by the Maine CDC before it is matched into ImmPact and may be included on one of the reports as not being tested.

### Test Due List Report

#### Select a Report

- One Year Old Test
- Two Year Old Test

Reached 18 months of age, but less than 36 months of age, and no lead test between 18 months of age and less than 36 months of age.

#### Select Time Frame

Time Frame: Today ▼

- Today
- Next 7 Days
- Next 30 Days
- Next 60 Days
- Next 90 Days

The list reports will be populated with ImmPact data according to the selected criteria and time frame up to the date selected. Results are sorted in a chronological order by date of birth, with the oldest child first. In rare instances, a child's record may require manual review by the Maine CDC before it is matched into ImmPact and available for a report.

## Follow-Up Action Needed List Report

### Select a Report

- Requires Follow-Up/Management
- Requires Venous Sample Analyzed By the Maine Health and Environmental Testing Laboratory
- Requires Repeat Test
- BLL <5 ug/dL

Please select either an Age Range option or a Birth Year.

**Select Age Range**

- 0 to less than 3 years
- 3 to less than 6 years
- 6 to less than 12 years
- 12 to less than 18 years

**Select Birth Year**

- Birth year
- Year

The list reports will be populated with ImmPact data according to the selected criteria up to the date the report is generated. In rare instances, a child's record may require manual review by the Maine CDC before it is matched into ImmPact and available for a report.

The Follow-up Report identifies patient who need follow-up blood tests.

- Requires Follow-up identifies patients who's last blood test was a confirmed test greater than 5 µg/dl.
- Requires Venous Sample identifies patients who's last blood test was an elevated capillary
- Requires Repeat Test identifies patients who's last test could not be run by the lab and must be resampled.

Select the report to be run, the age range to use or the birth year and select Generate.
