2019 Novel Coronavirus (COVID-19) is a respiratory illness. It is caused by a coronavirus. COVID-19 is spreading in the United States, including Maine.

**Common Signs and Symptoms**

- Fever or Chills
- Cough
- Shortness of Breath and Trouble Breathing
- Headache

Other symptoms can include fatigue, muscle or body aches, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea, confusion or change in mental status, chest pain or pressure, inability to wake or stay awake, and pale, grey, or blue-colored skin, lips, or nail beds. Symptoms may begin 2 to 14 days after exposure to the virus. Reported illnesses range from mild to severe.

Older adults and people who have severe underlying medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing more serious complication from COVID-19. Severe disease can cause pneumonia, kidney failure, and death.

Call your healthcare provider if you have symptoms. Tell them if you had any contact with any known COVID-19 cases. If you need medical care, please call the healthcare facility BEFORE you arrive.

For information on where to get tested, please visit www.maine.gov/covid19/restartingmaine/keepmainehealthy/testing.
Spread of COVID-19

- Can spread easily from person-to-person
- Most commonly spreads during close contact (within 6 feet)
- Can sometimes spread by exposure to the virus in small droplets that can stay in the air
- Spreads less commonly through contact with contaminated surfaces
- Rarely spreads between people and animals

Prevention of COVID-19

Physically distance yourself (at least 6 feet) from non-household members
Wear a cloth face covering that covers your nose and mouth
Avoid large gatherings and crowded public places
Wash your hands with soap and water for at least 20 seconds

Use an alcohol-based hand sanitizer with at least 60% alcohol if soap and water are not available. You should also cover coughs and sneezes with a tissue or the inside of your elbow.

There is no specific treatment for COVID-19. Most people recover at home.
