

Memo: Promotion of Pop-Up Clinics & Inclusion on State Website

As Maine DHHS and CDC shift our vaccination strategy from large throughput clinics to smaller scale clinics in communities across the state, we continue to offer support in promoting and raising awareness about where people in Maine can get vaccinated. To that end, if you are offering vaccination clinics, either as a provider or in conjunction with a community partner, please consider letting Maine CDC know so that we can update our [website](#), community vaccination phone line, and promote via the Maine CDC social media channels.

For inclusion on our website and promotion on social media channels, please email Maine CDC's Director of Vaccine Communications Lindsay Hammes at lindsay.hammes@maine.gov with the information in the table below, including whether you will be vaccinating eligible Mainers 12 and older or only those 18 and older.

Name and Address of Provider	Municipality	County	Scheduling/Clinic Info (Dates/times/whether an appointment is needed and how to make one, if so).	12+ or 18+	Public/Patient Only
(EXAMPLE) Portland Community Free Clinic, 103 India Street	Portland	Cumberland	Call 874-8982 to schedule an appointment. Drop-ins welcome.	18+	Public

As a reminder, to apply for a pop-up vaccination clinic, organizations need a minimum of ten people looking to get vaccinated. The application to host a pop-up clinic can be found [here](#).

Maine DHHS offers support with flyers that you can adapt in multiple languages to support the event, on-site translation and cultural brokers, as well as transportation to vaccination events. As you plan the event, consider people you want to include and if it might be helpful for us have support for other languages or cultures via signage, marketing, or on-site translation. To access these services, email Maine DHHS COVID-19 Social Support at Sharon.McDonnell@maine.gov.
