(based on age and series)

Adolescent Age Group: 13-17

Data: ImmPact, Maine IIS

Immunization Coverage Rate

Immunizations remain the single most effective way to protect Mainers against infectious diseases and some cancers. The Maine Immunization Program reviews state and national data to assess and improve immunization rates, identify populations at risk, and measure the impact of current initiatives.

Map Created: 11/1/2018 Data as of: 9/30/2018
