

Refilling Reusable Beverage Containers: Guide for food service workers

What kind of beverage container can be refilled?

A reusable beverage container is a durable receptacle that is typically made of metal, or sturdy plastic designed to be cleaned, sanitized, and refilled for repeated use.

Cleaning of beverage container

The beverage container must be washed and rinsed well before being brought to the establishment or rinsed by the establishment under pressurized hot water.

Who can refill the container?

- An employee of the food establishment
- The owner of the container (as long as the container does not need to be pushed against a lever to get the beverage)

Any consumer-owned container may be filled at a water vending machine
