

PFAS Compounds in parts per trillion (ppt)

This Table lists all Maine Public Water Systems (PWS) currently required to sample for PFAS. The "Sum of the six Maine-regulated PFAS analytes (2802-2807)" column, if populated, represents the sum of the six regulated PFAS compounds in Maine. The results are from the most recent finished water samples reported to the Maine CDC Drinking Water Program as compliance samples since June 2021 and processed in the database as of 10/28/2024. Only the compounds that have detections are reported. For more information about PFAS, please visit:
