

Maine Weekly Arboviral Surveillance Report

October 29, 2024

January 1, 2024 – October 26, 2024:

Local Arboviral Activity

Humans – Endemic arboviral illnesses

	Number Tested	WNV positive	EEE positive	JCV positive	POW positive
Current Week	2	0	0	0	0
2024 Year to Date	95	2	0	0	4

EEE, JCV, and WNV are endemic mosquito-borne arboviruses. POW is the only endemic arbovirus spread by ticks in Maine. Human arboviral testing performed at Maine's Health and Environmental Testing Laboratory (HETL). Testing may be performed year round. Number tested only reflects testing performed at HETL. Confirmation testing performed at CDC Fort Collins

Humans – Travel-associated arboviral illnesses

	CHIK positive	DEN positive	OROV positive	ZIK positive
Current Week	0	1	0	0
2024 Year to Date	0	6	0	0

Imported arboviral testing may be performed at HETL, CDC Fort Collins, or other national reference laboratories

Animals

	Number Tested	WNV positive	EEE positive
Current Week	1	0	0
2024 Year to Date	96	35	20

Animal arboviral testing may be performed at HETL, through the University of Maine Veterinary Diagnostic Laboratory, or through the National Veterinary Services Laboratory (NVSL); testing may be performed year round

Mosquitoes – Endemic arboviruses

	Pools Tested	WNV positive	EEE positive	JCV positive
Current Week	0	0	0	0
2024 Year to Date	1359	1	1	4

Mosquito EEE and WNV testing performed at HETL; mosquito JCV testing performed at CDC Fort Collins; mosquito collection begins June 1 and continues through September 30

Only completed testing is included in this report.

EEE = Eastern Equine Encephalitis
CHIK = Chikungunya
DEN = Dengue
JCV = Jamestown Canyon Virus
OROV = Oropouche Virus

POW = Powassan
SLE = Saint Louis Encephalitis
WNV = West Nile Virus
ZIK = Zika

2024 Maine positive results

Surveillance	Species	Collection Date	Town	County	Agent
Human		1/2/2024		Kennebec	POW
Human		3/28/2024		Lincoln	POW
Human		4/30/2024		York	POW
