General Information and Instructions

Background and Purpose:
The Programmatic Monitoring and Standards Assessment Tool and Report (PMSATR) was designed to comply with 42 U.S.C. 9901 et seq., §678B, as amended, which requires each state to conduct a full on-site review of each Eligible Entity (EE) at least once during each three-year period, as well as to assess compliance with the organizational standards put forth by the United States Department of Health and Human Services (HHS) in Community Services Block Grant (CSBG) Information Memorandum (IM) No. 138 (as published on January 26, 2015).

The PMSATR is based in part on a similar tool created by the Community Action Partnership to assess compliance with the organizational standards. The tool was expanded to include indicators which will be used by reviewers to verify that the EE has operationalized and complied with each standard.

Guiding Principles to Monitoring

Mutual Respect – In working with local boards, staff, and consultants, OCFS recognizes and will value the unique knowledge, ability, and independence of each person. We are committed to treating all persons fairly and maintaining credibility by matching actions with words.

Open Communication – Effective communication is key in facilitating good working relationships amongst partners, and OCFS is committed to keeping lines of communication open. The purpose of our communications is to assist in developing solutions to problems, to share program improvement ideas, and to provide information on new developments in the anti-poverty field. We will communicate frequently through a variety of tools and media. OCFS is committed to listening to suggestions and concerns, to gaining an understanding of local operations, and to assisting local CAAs in pursuing their priorities.

Joint Problem Solving – OCFS believes that a team approach to problem solving is in the best interest of all parties involved. Our office sincerely believes that collectively OCFS, the CAA, and our other community action partners can arrive at the best solution to any situation. Through a team approach to problem solving, we can come up with the best strategies for program development, conflict resolution, and compliance issues. OCFS wants to promote an environment in which our office and all our community action partners will be open to change and can work together in exploring options and developing mutually agreeable solutions. The goal is to have agencies function independently but with OCFS support in an effort to meet the needs of local communities within the parameters set by legislation.

Process:

Maine EEs are contractually required to complete an Agency Self-Assessment which encompasses all organizational standards and supporting documentation. The 2019, site reviews will provide face-to-face feedback of the self-assessment, as well as review each standard and supporting documents, to include any updates that have occurred since the self-assessment. The EE is also able to provide additional sources of documentation in order to demonstrate compliance.

Rating:

A score will be assigned to each assessment for compliance with the organizational standards. The rating is based on the percentage of applicable standards which were determined to be “met”.

Reports:

A preliminary report, including findings, observations, and/or recommendations, will be provided to the EE electronically within 60 calendar days of the conclusion of the on-site review. Since the reviews are conducted in collaboration with DHHS’ Division of Audit, OCFS will follow up with them regarding their
review, to ensure any necessary feedback is incorporated. The EE will have the opportunity to comment on the content of the preliminary report. Comments must be received from the grantee within 30 business days upon receipt of the preliminary report. The comments may include additional documentation to address unmet standards or unmet indicators.

Upon receipt of comments, a final report will be prepared and issued to the EE. The final report will include comments received from the grantee.

**Follow up:**
Following the assessment process, if the State finds an EE is not meeting a standard or set of standards, the State’s response will depend on the circumstances. In cases in which the EE may be able to meet an unmet standard in a reasonable timeframe, OCFS will prepare a Continuous Improvement Plan (CIP) listing recommendations for the unmet standards. The OCFS CSBG Grant Administrator and Fiscal Representative (if applicable) will verify progress made by the agency in carrying out the recommendations in the plan during regularly scheduled visits, meetings, phone conferences, etc.

In cases in which the EE may be able to meet an unmet standard in a reasonable timeframe contingent on some targeted, technical assistance, the State and EE may develop a Technical Assistance Plan (TAP) to target training and technical assistance resources and outline a timeframe for the entity to meet the standard(s).

If appropriate, the State may initiate action in accordance with section 678C of the CSBG Act (42 U.S.C. § 9915), including issuance of a Notice of Deficiency and the establishment of a Quality Improvement Plan (QIP) with clear timelines and benchmarks for progress.

*The failure of an EE to meet multiple standards, or in cases where one or more serious findings or deficiencies (including but not limited to, contractual non-compliance, non-compliance with Federal or State laws, non-compliance with agency bylaws, financial irresponsibility, failure to adequately provide services, conversion, fraud, corruption or abuse) may reflect deeper organizational challenges and risk. In those cases, OCFS will notify HHS, Office of Community Services and determine whether it may be necessary to take additional actions, including initiating action to reduce or terminate funding, in accordance with section 678C of the CSBG Act (42 U.S.C. § 9915; see also, CSBG IM 116, “Corrective Action, Termination, or Reduction of Funding,” issued May 1, 2012).

Guidance

- Reporting to the governing board would most likely occur at a regular board meeting and should be reflected in minutes.

- There is no one mandatory tool for completing this task. This comprehensive assessment is more than the financial risk assessment contained in the audit and may also include such areas as: insurance, transportation, facilities, staffing, property, etc. To meet the Standard, the tools(s) used needs to address organization-wide functions, not only individual program requirements.

**Standard 8.9** The governing board annually approves an organization-wide budget.

**Guidance**
- This would be met through approval at a regular board meeting and documented in the board minutes.
- This is intended to complement, not replace, program budgets.
- It is recognized that each grant or program will likely have an annual budget that may cross two agency fiscal years.
- It is important to note that an organization-wide budget is a forecast for the upcoming organization fiscal year, based on the best information at the time of development. It provides the board with an overview of what the expected revenues and expenditures are likely to be over the course of a year, with the knowledge that the actual revenue and expenditures may differ. There is no requirement for the organization to pass a modified organization-wide budget during the course of a year as things change.

Operations and Accountability – Category 9: Data and Analysis

Standard 9.3  The organization has presented to the governing board for review or action, at least within the past 12 months, an analysis of the agency’s outcomes and any operational or strategic program adjustments and improvements identified as necessary.

Guidance

- This Standard would be met through board or staff discussions as long as the analysis and discussion are documented.
- It is important to note that an organization is likely to have multiple programs with varying program years. This standard addresses an annual review of organization outcomes. Organizations are likely to make operations and strategic program adjustments throughout the year, making a single point in time analysis less effective than ongoing performance management.
- Organizations can meet this standard by having: an annual board discussion of organization outcomes, multiple conversations over the course of the year, or other process the organization deems appropriate as long as these discussions are reflected in the minutes, with any operational or program adjustments or improvements being noted.
- Organizations are not required to make adjustments in order to meet the standard, only to have conducted an analysis.
