

FACT SHEET
State Adolescent Treatment Enhancement Dissemination (SAT-ED)
Office of Substance Abuse and Mental Health Services
Maine Department of Health and Human Services

Facts

SAT-ED is a cooperative agreement with federal SAMHSA.

Nearly 3 million dollars over three years.

The SAT-ED was designed to bring together stakeholders across the child-serving systems to develop and/or enhance a coordinated network that will **develop policies, expand workforce capacity, disseminate evidence-based practices, and implement financial mechanisms** and other reforms to **improve the integration and efficiency** of the adolescent substance use, co-occurring substance use and mental disorders treatment, and recovery support system.

Purpose

State-wide initiative to enhance and expand treatment and recovery for adolescents (12-18 year olds) with substance use disorder and substance use with co-occurring mental health disorders.

Requirements

- Partner with two treatment provider agencies that will utilize the pro-social evidence based practice, Adolescent Community Reinforcement Approach (ACRA) for the treatment of youth substance use disorder and youth substance use disorder with co-occurring mental health disorder.
- Promote comprehensive, integrated services for youth with substance use or co-occurring substance use and mental disorders through the formation of an Advisory Council. The role of the Council will include:
 - Identify service gaps;
 - Participate in infrastructure reform;
 - Policy development;
 - Participate in an agency financial map.
- Creation of a multi-year, State wide workforce development training implementation plan for the child-serving sector, covering adolescent substance use and related issues, including the dissemination of EBPs.
- Link and coordinate with financing mechanism that provide substance use treatment and recovery support services to adolescents and their families.
- Develop a cross agency State wide financial map of Federal, State, local financial resources available for treatment and recovery services for adolescents with substance use disorder or substance use disorder with co-occurring mental health disorder.

Expected Outcomes

Increased rates of abstinence, enrollment in education, vocational training, and/or employment, social connectedness, and decreased juvenile justice involvement for adolescents provided services through this cooperative agreement.
