# SIM Focused Approach Overview

Sharpening SIM Focus on Fragmented  
Care and Diabetic Care at the Practice  
Level

March, 2016

# SIM Innovation Progression: Broad Based to Specific Practice Level Focus

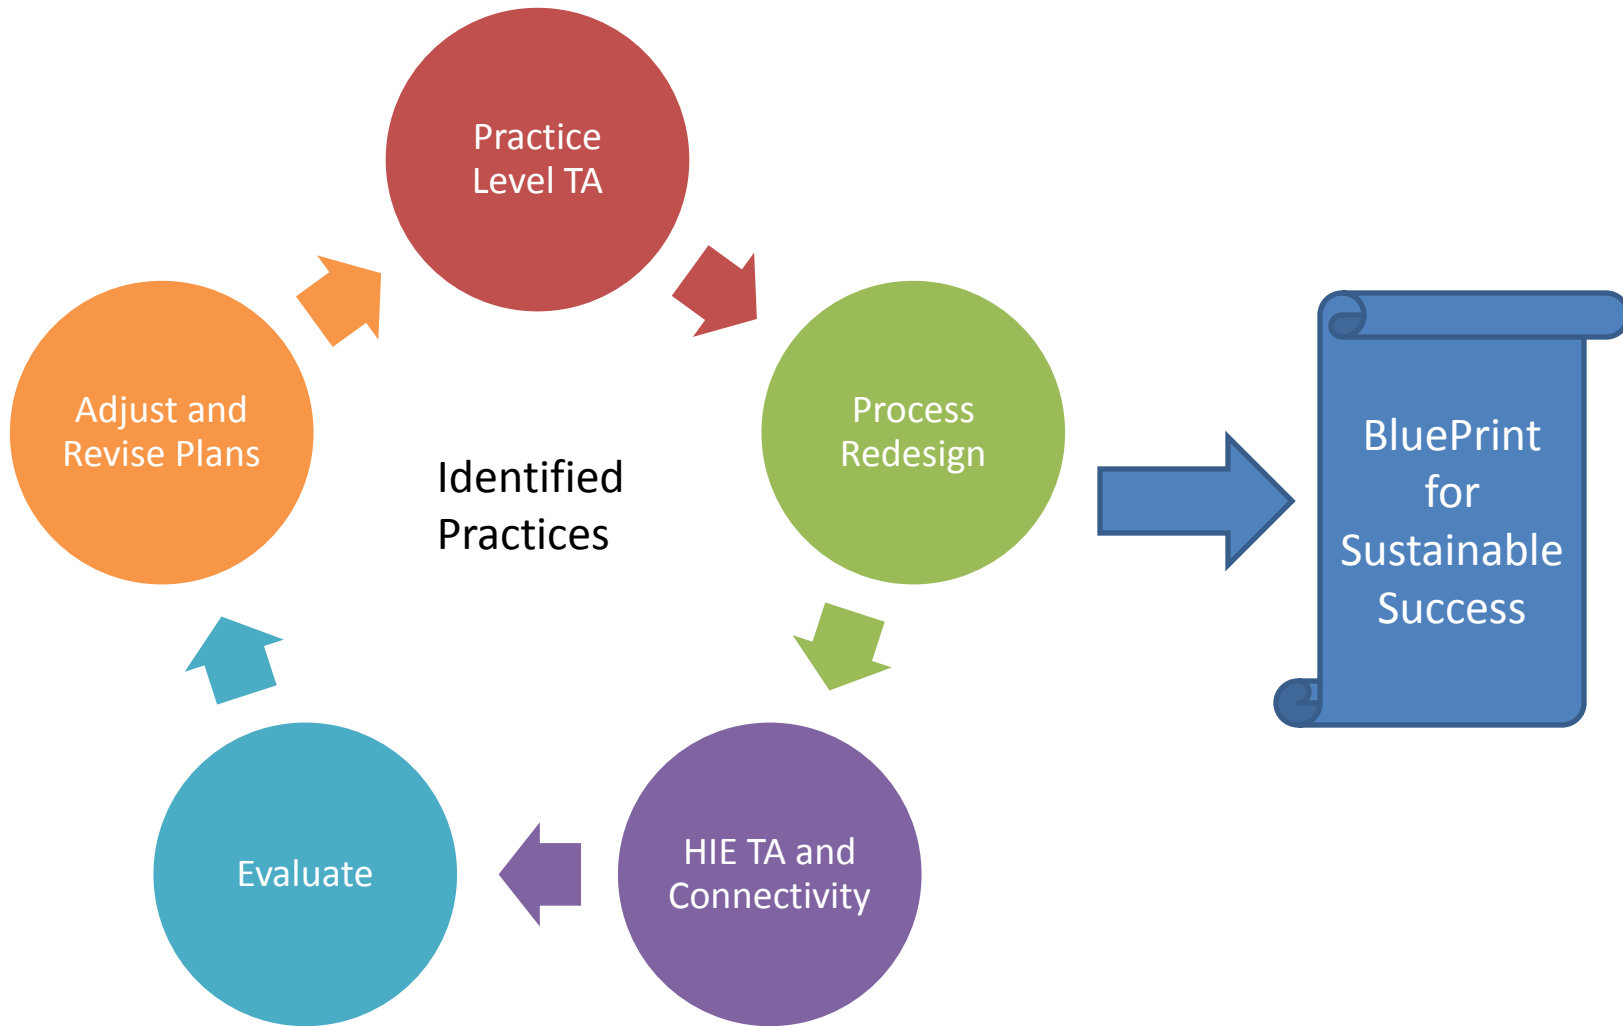

# SIM Practice Level Focused Approach

- **MaineCare to select the providers with most opportunity for improvement in each SIM focused result area (fragmented care, diabetic care)**
  - **OCQI to provide practice level data**
- **Provide Interventions intended to specifically improve those results**
- **Use identified ‘bright spots’ (like practices showing strong results) to document, share, and implement best practices to lower performing practices**
- **Monitor and communicate results for remainder of the SIM through extended evaluation**
- **Develop ‘blueprints’ based on work process redesign successes where achieved**
- **Blueprints/work processes developed can be used to scale transformations to other practices, developing ‘standard operating models’ for practices**

# Practice Level Intervention, Evaluation, Measurement and Improvement (SIM NCE Period: 10/1/16 – 9/30/17)

## Sample Menu of Interventions Available to Provide

<u>Interventions Available to Provide to Practices</u>	<u>Objective of Support</u>
Practice Level Technical Assistance	Determine and implement 'bright spot' models applicable to given practice
Specific Process Redesign	Implement specific process improvements to maximize results in focus areas
HIE Technical Assistance and connectivity support	Provide ongoing and additional support to maximize HIT effectiveness and value and create sustainability
Rapid Cycle Evaluation at Practice level	Regularly evaluate results at practice level to determine levels of focus area improvement
Specific Clinical Process Intervention	Implement programs specific to clinical improvement - diabetes

# Additional SIM Extension Elements

- SIM Governance Continues through NCE period, with adjusted compositions
- Medicare Alignment Proposal Oversight Team is a Key Component of SIM Governance
- Payment Model Development Alignment with Elements of Practice Transformation success
- Continued healthcare transformation sustainability strategy development
