

Term Definitions

- **Active Engagement** - The EP is in the process of moving towards sending "production data" to a PHA or CDR, or is sending production data to a PHA or CDR.
- **Active Engagement Option 1** - Completed Registration to Submit Data: The EP registered to submit data with the PHA or, where applicable, the CDR to which the information is being submitted; registration was completed within 60 days after the start of the EHR reporting period; and the EP is awaiting an invitation from the PHA or CDR to begin testing and validation. This option allows EPs to meet the measure when the PHA or the CDR has limited resources to initiate the testing and validation process. EPs that have registered in previous years do not need to submit an additional registration to meet this requirement for each EHR reporting period.
- **Active Engagement Option 2** - Testing and Validation: The EP is in the process of testing and validation of the electronic submission of data. EPs must respond to requests from the PHA or, where applicable, the CDR within 30 days; failure to respond twice within an EHR reporting period would result in that EP not meeting the measure.
- **Active Engagement Option 3** - Production: The EP has completed testing and validation of the electronic submission and is electronically submitting production data to the PHA or CDR.
- **Production Data** - Data generated through clinical processes involving patient care. This term is used to distinguish between data and "test data," which may be submitted to test electronic data transfers.
