Notification of Changes**

April 25, 2025

This notice is in effect until repealed or replaced

Under the authority of 12 M.R.S.A. § 6172; the Commissioner has made the following change to Area No. 64-B; this notice precautionarily closes Area No. 64-B (Machiasport to Calais) to the taking of mussels, European oysters, razor clams, surf/hen clams and carnivorous snails due to the risk of seasonal contamination by naturally occurring marine biotoxins. Exceptions to this closure are defined in the legal notice text and are subject to strict sampling requirements that ensure the safety of harvested product. All other species may be harvested throughout the region. An interactive map that allows the user to zoom in to specific areas can be found on the ME DMR website: [Shellfish Closures and Aquaculture Leases Map | Department of Marine Resources \(maine.gov\)](https://www.maine.gov/dmr/shellfish-closures). All other existing pollution and biotoxin closures remain in effect.

The boundary descriptions of the area are as follows (struck text is being removed and underlined text is being added):

- A. Effective immediately, because of biotoxin, it shall be unlawful to dig, take or possess any mussels, European oysters (*Ostrea edulis*), razor clams (*Ensis directus*) or surf/hen clams (*Spisula solidissima* and *Mactromeris polynyma*) and carnivorous snails from the shores, flats and waters of the following areas:
