VIEW LANDINGS REPORTS

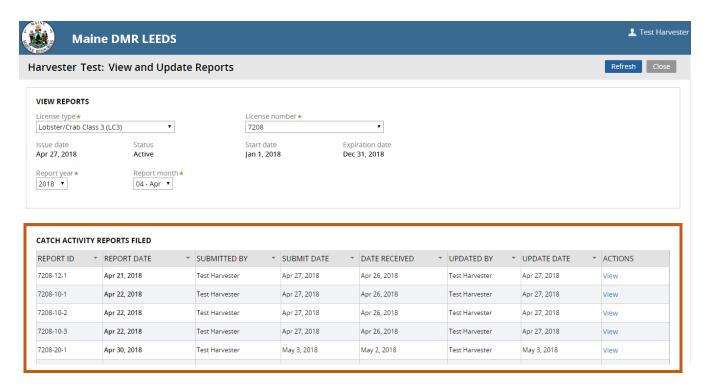

1. Click on "View Landings Reports" to see the details of the landings reports you've submitted for your license(s).

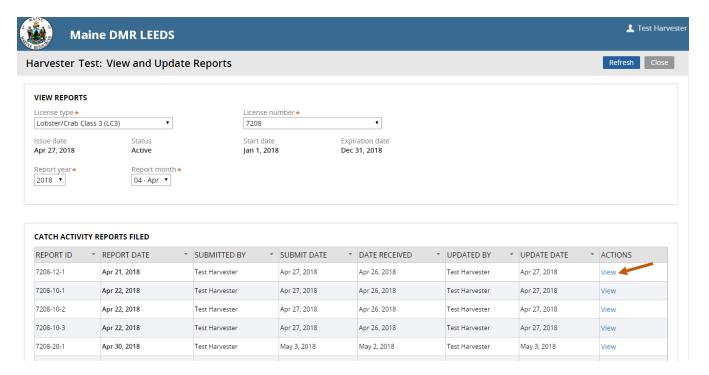

2. Click the drop-down arrows to choose the license type, license number, report year, and report month for the license you want to view landings reports for.

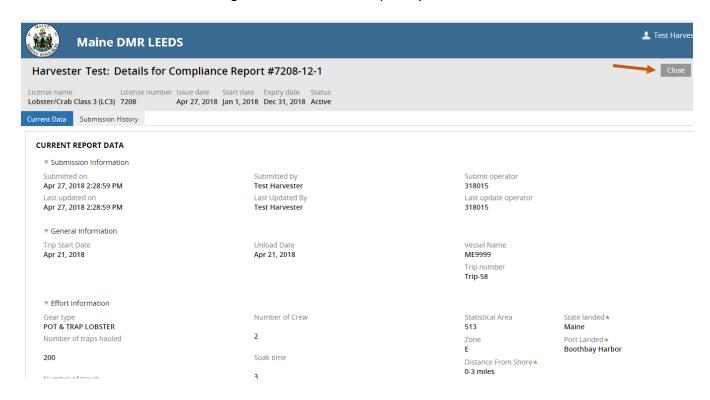

3. Once you've chosen your license and reporting timeframe, a list of submitted reports will automatically display with the header "Catch Activity Reports Filed."

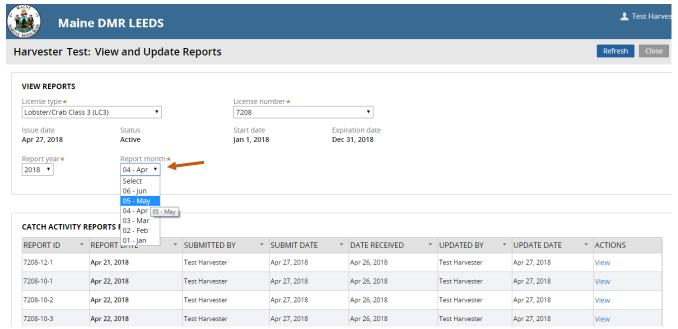

4. Click "View" to select the day of the month for which you want to review your catch.

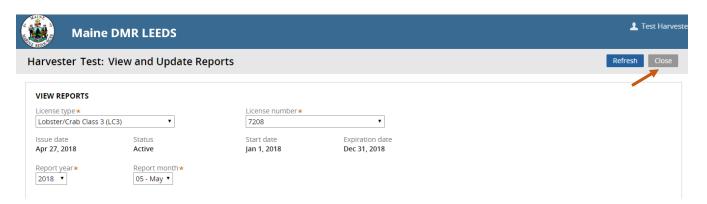

5. Once you click "View," you will see the information associated with your catch for that day. Click "Close" to leave this screen and go back to the list of reports you submitted for the month.

6. Once you've returned to the list of reports for the month, if you decide you want to view reports for the same license but another month, use the drop-down arrow to change the report month. Once you select the month you want to view, the "Catch Activity Reports Filed" will generate a new list of reports. If you want to view reports for another license, use the drop-down arrows to change the license type and number.

When you're done viewing your landings reports, you can return to the main page by clicking "Close."

You will then receive the following pop-up message. Click "Discard." You will not lose or change any data. This will return you to your main page.
