Chapter 11 Scallops

11.01 Definitions

1. Chafing gear or cookies.
Chafing gear or cookies, with respect to the scallop fishery, means steel, rubberized, or other types of donut rings, disks, washers, twine, or other material attached to or between the steel rings of a sea scallop drag or dredge.
2. Drag, dredge, drag gear, or dredge gear.
Drag, dredge, drag gear, or dredge gear, with respect to the scallop fishery, means gear consisting of a mouth frame attached to a holding bag constructed of metal rings, or any other modification to this design, that can be or is used in the harvest of scallops.
3. Drag or dredge bottom.
Drag or dredge bottom, with respect to the scallop fishery, means the rings and links found between the bail of the drag or dredge and the club stick, which, when fishing, would be in contact with the sea bed. This includes the triangular shaped portions of the ring bag commonly known as “diamonds”.
4. Drag or dredge top.
Drag or dredge top, with respect to the scallop fishery, means the mesh panel in the top of a drag or dredge and immediately adjacent rings and link found between the bail of the dredge, the club stick, and the two side panels. The bail of the dredge is the rigid structure of the forward portion of the drag or dredge that connects to the warp and holds the drag or dredge open. The club stick is the rigid bar at the tail of the drag or dredge bag that is attached to the rings.
5. Scallop Management “Zone One (1)” includes all coastal waters West of a line beginning at the easternmost point of Fort Point State Park on Cape Jellison then running southwesterly to channel marker #1 South of Sears Island, then running southwesterly to channel marker RW “II” located between Marshall’s Point and Bayside in the Town of Northport, then running southwesterly to Graves channel marker southeast of the Town of Camden, then running southeasterly to the Penobscot Bay Buoy “PB” East of Rockland Harbor, then running southerly to the TBI whistle southwest of Junken Ledge, then running southeasterly to Red Nun #10 buoy at Foster Ledges, then running due South magnetic to the boundary of the State’s coastal waters to the New Hampshire border.
6. Scallop Management “Zone Two (2)” includes all coastal waters East of the line defined in the preceding subsection 5 for Zone One, including all coastal waters of the Penobscot River North of Fort Point State Park to the Lubec-Campobello Island bridge.
7. Scallop Management “Zone Three (3)” includes all coastal waters North and East of the Lubec-Campobello Island bridge including all of Cobscook Bay and the St. Croix River inside Maine territorial waters.

11.02 Reporting: See Chapter 8.

11.03 Atlantic Sea Scallops Harvesting Season

A person may not fish for or take scallops in Maine’s territorial waters from April 16th to November 30th, both days inclusive. Open days for harvesting Atlantic sea scallops are established in 11.11.

11.04 Configuration of Scallop Drag

1. Minimum mesh size.

A. Twine top restrictions.

The mesh size of net material on the top of a scallop dredge in use by or in possession of vessels in the Atlantic sea scallop fishery shall not be smaller than 5.5 inches (13.97 cm).

- (1) For vessels rigged with a dredge or dredges, and each individual dredge is greater than 8 ft (2.44 m) in width, there must be at least seven rows of non-overlapping steel rings unobstructed by netting or any other material, between the terminus of the dredge (club stick) and the net material on the top of the dredge (twine top).
- (2) For vessels rigged with a dredge or dredges, and each individual dredge is greater than 3.5 ft (1.07 m) and less than or equal to 8 ft (2.44 m) in width, there must be at least four rows of non-overlapping steel rings unobstructed by netting or any other material, between the club stick and the twine top of the dredge.
- (3) For vessels rigged with a dredge or dredges, and each individual dredge is 3.5 feet (1.07 m) or less in width, there must be at least one row of non-overlapping steel rings unobstructed by netting or any other material, between the club stick and the twine top around the circumference of the top of the dredge. The twine top must be hung on no more than two diamond meshes per ring on the top and bottom and a single diamond mesh per ring on the sides. Alternative designs may be approved by permit from the Commissioner.

B. Measurement of mesh size.

Mesh size is measured by using a wedge-shaped gauge having a taper of 2 cm in 8 cm and a thickness of 2.3 mm, inserted into the meshes under a pressure or pull of 5 kg. The mesh size is the average of the measurements of any series of 20 consecutive meshes for nets having 75 or more meshes, and 10 consecutive meshes for nets having fewer than 75 meshes. The mesh in the regulated portion of the net will be measured at least five meshes away from the lacings running parallel to the long axis of the net.

2. Chafing gear and other gear obstructions.

A. Chafing gear restrictions.

No chafing gear or cookies shall be used on the top of a scallop dredge.

B. Link restrictions.

No more than double links between rings shall be used in or on all parts of the dredge bag, except the dredge bottom. No more than triple linking shall be used in or on the dredge bottom portion and the diamonds. Damaged links that are connected to only one ring, i.e., "hangers", are allowed, unless they occur between two links that both couple the same two rings. Dredge rings may not be attached via links to more than four adjacent rings. Thus, dredge rings must be rigged in a configuration such that, when a series of adjacent rings are held horizontally, the neighboring rings form a pattern of horizontal rows and vertical columns.

C. Dredge or net obstructions.

No material, device, net, dredge, ring, or link configuration or design shall be used if it results in obstructing the release of scallops that would have passed through a legal sized and configured net and dredge, as described in this part, that did not have in use any such material, device, net, dredge, ring, or link configuration or design.

3. Minimum Ring Size

A person may not use a drag to fish for or take scallops in the territorial waters with rings that measure less than 4 inches.

1. State Waters Drag Size Restriction

It shall be unlawful to possess on any vessel fishing for scallops, or to fish for or take scallops, in Maine's territorial waters:

- C. The amount of scallop meats on board does not exceed the maximum amount authorized by the vessel's Federal Permit.
- D. The vessel has all fishing gear (dredges, drags) securely stowed when transiting Maine's territorial waters. Securely stowed shall mean the main wire shall not be shackled or connected to the dredges or drags, and the towing swivel will be at block or on the winch.

11.08 Targeted Scallop Conservation Closures

Targeted closures are imposed as conservation measures to assist in rebuilding specific areas of the state. Targeted closures may be implemented based on depletion, seed, the presence of spat-producing scallops, and other conservation factors as determined by the Commissioner. Targeted closures are not seasonal closures and are implemented in order to improve and enhance the conservation and rebuilding of the resource in these specific areas.

It shall be unlawful to fish for, take, or possess scallops taken by any method within any of the following closed areas, except for Muscle Ridge (1) which shall be open to diving on Thursdays and Fridays and shall be open to dragging on Tuesdays and Wednesdays, in dates specified in section 11.09 and for Casco Bay (27) which shall remain open to hand harvest (scuba divers). All directions are relative to True North (not magnetic).

Transiting exception:
