☒ Yes

☐ No

2. Describe the aquaculture activities conducted or explain why aquaculture was not routinely conducted:

Oysters were placed on the lease into oyster grow cages either directly from hatchery or from other nursery leases. Oysters were grown to market size and then harvested and sold. We grow oyster seed in our state approved hatchery. Seed is then transferred to Mook Sea Farm leases for grow out to market size.

H. Possible Future Use of the Site

1. If the lease is renewed, describe your plans for the site over the course of the requested term.

We plan to continue to use the lease for market oyster grow out, both in surface gear as well as bottom planting stock for market grow out. We also would like have the option of growing Bay Scallops, and Hard Clams in approved gear on the lease.

2. For salmonid sites only. What is the proposed stocking density of pens in the lease area? As a reminder, proposed stocking density of pens in the lease area cannot exceed 30 kilograms per cubic meter per statute.

3. Bird Deterrents. Only complete this section if you are culturing shellfish using suspended gear.

To comply with the National Shellfish Sanitation Program (NSSP) Model Ordinance (MO), DMR is requiring that applications for the suspended culture of shellfish include a description of mitigation or deterrent measures to minimize the potential pollution impacts of birds at the site. Use the space below to list your mitigation or deterrent measures:

Most birds can be kept off gear with activity in the area, but if they become an issue, we plan on using large cable ties, sold by Ketcham Taps, which have been shown to be effective in preventing birds from landing on gear. The cable ties are 175lb rated, black, and UV treated.
