## AQUACULTURE LEASE RENEWAL APPLICATION

*For renewing a Scientific Experimental Lease*

Please send this completed application and a certified tax map and updated list of riparian owners to the DMR Aquaculture Division at the above address. Please contact the Aquaculture Division at (207) 350-7815 or [DMRaquaculture@maine.gov](mailto:DMRaquaculture@maine.gov) with any questions.

1. Name of leaseholder: Sarah Gladu

Address: Coastal Rivers Conservation Trust, 3 Round Top Lane (PO Box 333),

Damariscotta Maine 04572

E-mail Address: sgladu@coastalrivers.org Telephone: 207-380-3499 (cell)

2. Provide the acronym of the scientific lease you request to be renewed:

DAM BP

3. Describe the type and amount of aquaculture to be conducted during the new term:

The Eastern Oyster (*Crassostrea virginica*) is the only species that will be grown. Source of the seedstock include Muscongus Bay Aquaculture (Bremen, ME), Pemaquid Oyster Company (Waldoboro, ME) and Mook Sea Farm (Walpole, ME). Each student receiving 250 seed, at about 15mm in size. We anticipate having 10 students in the program and they will be with us in the program for up to 2 years. The site is used March 1 through December 30<sup>th</sup> and the oysters are wintered either in cold storage or at our Dodge Pt LPA.

The oysters are grown on Rebar tables ('oyster tables' or 'trestles') about 15 feet from the shore and standard shellfish growing bags (no floats or bridles needed) will be attached to these. The tables will be approximately 6' in length, and each will hold up to 4 bags. Approximately 15 tables are anticipated on the lease site. Tables will be of a single level, and will sit approximately 6" to 12" above the sediment surface. Harvest for the oysters consists only of removing them from their growing bags. Approximately 4,000 to 6,000 oysters will be on this site at any one time.

FAX: (207) 624-6024

Describe the amount of aquaculture conducted on the lease site during the previous lease term, including but not limited to seeding, cultivation or harvest of organisms:

We kept around 4-6,000 oysters on the site at any one time in the last lease term. We obtained seedstock and grew them for up to 18 months before they were harvested by students.

The site will be used for educational purposes and field trial (growing species by means of a less common method, suspended from fixed tables in the near-shore area). As an educational program, the site is accessible by the Coastal Rivers and use it as a teaching tool for members and guests who are not necessarily part of the OG program. For example, we welcome many groups of children and young students to the property, and we can use the site as a way to teach material related to water quality, food production, multiple use of natural resources, management, and many other issues.

**RIPARIAN**

**THIS LIST MUST  
CERTIFIED BY**

JANET T. MILLS  
GOVERNOR

**BE**

**THE TOWN CLERK**

PATRICK C. KELIHER  
COMMISSIONER

On this list, please include the map number, lot number, and the current owners' names and mailing addresses for all shorefront parcels within 1,000 feet of the lease site. It is the applicant's responsibility to assemble the information for the Town Clerk to certify. The Town Clerk *only* certifies that the information is correct according to the Town's records. Once you have completed the form, ask the Town Clerk to complete the certification section below. If riparian parcels are located within more than one municipality, provide a separate, tax map and certified riparian list for each municipality.
