

# SURVEY PROGRAM MONTHLY REPORT

## OCTOBER 2025

Department of Marine Resources - Division of Marine Mammal Research

### INTRODUCTION

The Department of Marine Resources (DMR) Division of Marine Mammal Research Survey Program conducts monthly aerial and vessel surveys for North Atlantic right whales. More information on survey background, implementation and methodology can be found on the [DMR website](#) and in the [2024 DMR Survey Program Annual Report](#). The data presented herein are preliminary and property of the State of Maine and not to be used or distributed without the express consent of the Division of Marine Mammal Research.

This monthly report contains sighting and effort data from aerial and vessel surveys as well as any opportunistic survey efforts conducted during the month of October in 2025 (**Table 1**). Opportunistic surveys include observations collected during other vessel-based DMR activities or any survey efforts that do not follow the standardized line-transect methodology, which entails surveying along pre-determined track lines at 10 knots (vessel) or 100 knots / 1000 feet (aircraft).
