CARL J. WILSON  
COMMISSIONER

## Available Stock at DMR Approved Land-Based Aquaculture (LBA) Facilities *Non-Shellfish Species*

This list reflects the current species available for sale or distribution from the licensed facilities included below. It is the responsibility of the purchaser to confirm availability of species with the facility prior to listing as a source for an aquaculture application. In accordance with regulation, a separate list is maintained for approved shellfish hatcheries.

|                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                          |
