In Re: Bailey Coffin
Standard Lease Application

Bailey Coffin's Expert Witness
Designation

A. Brian Beal, Ph.D.

Dr. Beal, a professor of marine ecology at the University of Maine at Machias, and director of the University's Marine Science Field Station, is the foremost authority on Maine's littoral zone. His C.V. is attached as Coffin Exhibit 10. He will testify to the absence of living eelgrass on the lease site and to flaws in the DMR Site Review.

B. Parker Hadlock, P.E.

Mr. Hadlock, a Maine licensed Professional Engineer and a project manager for Cianbro Corporation, has boated recreationally out of South Freeport Harbor for more than fifty years. He is intimately familiar with the area of the proposed lease and will testify as to the minimal impact the lease would have on recreational boating.

C. Coley Mulkhern.

Captain Mulkhern is president of Lionel Plante Associates, Inc. and master of a small cargo ship which calls at the ramp at the north end of Bustins Island. He will testify that, provided the proposed lease area is modified in a manner to be presented at hearing, and provided certain buoy and buoy anchor specifications to be testified to are part of the lease requirements, the ship will be able to enter and leave the Bustins Island ramp safely.
