

CRITERIA FOR DISTINGUISHING SUPPLY ITEMS FROM EQUIPMENT ITEMS

At first "no", item is determined to be a supply, not equipment

EQUIPMENT**

** An equipment item is any instrument, machine, apparatus or set of articles that meets all of the following criteria:

- 1) It retains its original shape, appearance and character with use.
- 2) It does not lose its identity through fabrication or incorporation into a different or more complex unit or substance.
- 3) It is nonexpendable; that is, if the item is damaged or some of its parts are lost or worn out, it is more feasible to repair the item than to replace it with an entirely new unit.
- 4) Under normal conditions of use, including reasonable care and maintenance, it can be expected to serve its principal purpose for at least one year.
