Types of Questions Data Reflection

Once you have collected your data, reflect on the types of questions asked.

1. What types of questions do you generally ask? (What does the data show)

2. Is there a good balance of the types of questions being asked? (What does the data show)

 Are there opportunities to adjust/change the types of questions you ask? (Where in the lesson could a different type of question be used to support/further student learning?)

4. What are some next steps you will take when planning lessons/units in regards to the types of questions that will be asked?
