In this session, facilitated by Dr. Katie Novak and DJ Swiff, you will learn that MTSS isn't something you do, but rather a system you build to best meet the needs of all learners. #mtssisnotaverb While rocking out to a co-created playlist, attendees will understand the big picture of MTSS and then zoom in to the drivers necessary to create a more inclusive and equitable system.

Come and be inspired as you learn about the science of implementation, the importance of first best instruction with Universal Design for Learning (UDL), and the power of expert learning. This session will plant seeds so you are better prepared to create strategic plans that impact learners from preschool to adulthood in ways that are innovative, inclusive, and impactful (and fabulous!).
