Session Title
Make Waves with Digital Tools

Presenters
Rachel Guthrie and Gwyneth Maguire

Elevator Pitch
Learn to attract media consumers with your animation skills! Communicate a message, tell a story, and share knowledge with these basic animation skills. This session will explore ways to use design principles and online tools to create and produce messages and evidence of learning through visual means.

Overview
In this session students will create using digital tools. We will explore the ways visual and graphic design principles can be used together to create appealing and functional designs that convey a message. This hands-on session will demonstrate the basics of design principles with digital tools and the students will explore various tools to create something that shares a message.
