

Session Title

Can You Teach A Machine?

Presenters

Jamee Luce (Waterville Senior High School)

Elevator Pitch

AI is the future! Learn how to teach a simple machine to recognize sounds, images, or movements using Google's Teachable Machine.

Materials

Laptops preferred; this software is browser-based, so any browser will work; access to Google Drive is preferred; there is an iPad App called TeachableMachine with limited capabilities; Webcams preferred; Headphones appreciated.

Overview

In this session, participants will start to understand the basics of how machine learning works, its implications on our culture and society, and who is responsible for outcomes, all while having a lot of fun! This is an interactive workshop where participants will leave with their own simple example uploaded to their personal Google Drive.
