

Swamps in Maine

Shrub swamps are seasonally flooded and have woody vegetation that doesn't grow very tall.

Beavers, yellow warblers, and skunk cabbage can be found in shrub swamps.

Forested swamps can be found along rivers and streams.

Royal Ferns, red maple trees, and wood turtles live in forested swamps.

Aquatic beds are found in shallow water next to ponds, lakes and slow-flowing rivers.

White water lilies, dragonflies, northern water snakes, and moose live in and near aquatic beds.
