Fund Classifications

A fund is a separate fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances or changes therein. Current fund classifications are presented below. Each classification is presented by a code number followed by a description.

Governmental Fund Types

Classification of Expenditures

Program

A program is a plan of activities and procedures designed to accomplish a predetermined objective or set of objectives. Nine broad program areas are identified in this guide that are intended to capture similar instructional services delivered to public (including charter) schools: regular education, special education, vocational education, other instructional (prekindergarten through grade 12), nonpublic school, adult/continuing education, community/junior college education, community services, and cocurricular/extracurricular activities. The program classification provides the school district with a framework to classify instructional and other expenditures by program to determine cost. For purposes of designating program codes for noninstructional expenditures, it may be necessary to create a designation for those costs that cannot be attributed to a specific program. Many state departments of education use a function/object matrix only, for reporting financial information from the school district to the state. Under this system, the function is subclassified to gather instructional program information. This results in only direct instructional costs being classified to the instruction function. Those support costs that provide support to specific instructional programs are classified as a general or other support function. Each classification is presented by a code number followed by a description.

0000 – Overhead. All charges which are not readily assignable solely to one program but provide support numerous programs are classified here. Charges to the following function areas would be coded to this program code: system administration, improvement of instruction, guidance, library, health, school administration, operations and maintenance, transportation, child nutrition, capital projects, debt service.

1000 – Regular Elementary/Secondary Education Programs. Only transactions for "other student support services", using function code 2910, should be coded here. Activities that provide students in 4 year old programs and prekindergarten through grade 12 with learning experiences to prepare them for further education and training for responsibilities as citizens, family members, and workers. Regular programs should be distinguished from special education programs that focus on adapting curriculum and instruction to accommodate a specific disability; from vocational/technical programs that focus on career skills; and from alternative education programs that focus on the educational needs of students at risk of failing or dropping out of school because of academic, behavioral or situational factors.

1100 – Elementary Programs. Regular programs of study for that part of the school organization which precedes approved secondary education. Elementary programs included in the 1100 series of program codes are for students in 4 year old programs and prekindergarten programs, as defined by Maine Education Statute, as well as students in kindergarten through grade 8.

1120 – K-2 Program. Regular program of study for students in any grade from prekindergarten to grade 2 who are at least four years old on October 15 of the school year. Use of this program code is required for tracking EPS targeted funds component; to be used with General Fund (1000) only. Expenditures of other funds should not be coded to this program as they are not considered for fulfillment of the EPS required spending for K-2.

1121 – **Pre-K Program.**

1122 – **4 Year Old Program.**

1200 – **Regular Secondary Programs.** Regular programs of study for that part of the school organization which includes not less than two consecutive grades from ninth through twelfth.

Special Programs include activities for elementary and secondary students receiving services outside the realm of regular programs. These services are related to conditions of mental retardation, orthopedic impairment, emotional disturbance, developmental delay, specific learning disabilities, multiple disabilities, hearing impairment, other health impairments, visual impairments including blindness, autism, deaf-blindness, traumatic brain injury and speech or language impairments. Special Programs is also inclusive of students receiving services related to Gifted and Talented programs.

2100 – **Regular Classroom Placement.** Instruction provided to special program students in a regular classroom environment.

2200 – **Resource Classroom Placement.** A Resource Class Placement is a placement in which a special program student receives instruction and supportive services OUTSIDE THE REGULAR CLASSROOM for 60 percent or less of the school day and at least 21 percent of the school day. This may include students with disabilities placed in resource rooms with special education/supportive services provided within the resource room, or resource rooms with part-time instruction in a regular class. Resource classes shall be located in chronologically age appropriate settings and the facilities shall be comparable to those in which regular education is provided to regular education students.

2290 – **Resource Room Costs for Unorganized Territory Students.**

2300 – **Self-Contained Class Placement.** A Self-Contained Class Placement occurs when a special programs student with a moderate or severe disability receives special education and supportive services OUTSIDE THE REGULAR CLASSROOM for more than 60 percent of the school day in a self-contained program.

2400 – **Homebound/Hospital.** Instruction provided by a teacher or tutor to special program students in hospital or home environments.
