ARP EANS II COVID-19

Additional factors that the Maine DOE will use to determine which non-public schools are most impacted by the COVID-19 emergency, include:

- Data from the cumulative COVID-19 cases reported by zip code, which identifies probable and confirmed cases. The non-public school community zip code will be the identifier for this data set that will be assessed at the beginning of October 2021. This publicly available data set is released by the Maine Center for Disease Control and Prevention (CDC) and accessed at <https://www.maine.gov/dhhs/mecdc/infectious-disease/epi/airborne/coronavirus/data.shtml>.
- Loss of Maine student tuition revenue as a result of declining student enrollment, which was reported in the CRRSA EANS intent to apply. The information requested on the CRRSA EANS intent to apply included student tuition revenue and student enrollment for October 2018, October 2019, and October 2020. Within the American Rescue Plan (ARP) EANS application the student tuition and student enrollment for school year 2021-2022 will be collected.
- Learning loss attributed to the COVID-19 emergency, which presented in a wide variety of educational barriers and disruptions. Some examples of the educational barriers and disruptions might include: insufficient technological support, loss of instructional time, family concerns for child(ren) safety and emotional well-being, and/or a decrease in student attendance in all modes of instruction (hybrid, remote, in-person).
- Lack of resources to address safety measures, recruit and retain educational staff, and promote social distancing.
