

Overarching CTE School Safety and Health Policy

Safety and health in our Career and Technical Education Centers must be a part of every operation.

The safety and health of every employee, student and visitor is a high priority. Management accepts responsibility for providing a safe working environment and each employee, student and visitor are expected to take responsibility for performing work in accordance with safe standards and practices. Safety and health will only be achieved through teamwork. Everyone must join together in promoting safety and health and taking every reasonable measure to assure safe working conditions in the school.

We will maintain a safety and health program conforming to the best practices of organizations of this type and OSHA standards as adopted by the Bureau of Labor Standards. To be successful, such a program must embody the proper attitudes toward injury and illness prevention on the part of supervisors and employees. It also requires cooperation in all safety and health matters, not only between supervisors and employees; but include students and visitors and between all departments, programs and their cohorts. Only through such a cooperative effort can an effective safety and health program be established and preserved.
