

Examples of Pathways

Noor

Noor takes Earth Science her junior year

Noor then takes AP Environmental Science her senior year

For her experiential project, she creates an Eco Market Day at her school with different booths from student clubs focused on the environment and sustainability

Noor presents her project during her school's Seal of Climate Literacy exposition

Ian

Ian takes his required first-year biology course, which has an extensive ecology section

Ian does an ELO/independent study his junior year working with a forester

For his experiential project, Ian works with his school and the Maine School Garden Network to create a pollinator garden at his high school

Ian presents his project to his local senior citizen home
