

How Do Wind and Water Change Earth?

1. **Read** these questions with your partner:

- What causes wind to blow?
- How does wind cause erosion?
- What is wind weathering?
- Why does wind weathering cause rocks to form strange shapes?

2. **Read** pages 6-9 with your partner. Annotate as you read.

3. After reading, **talk** about what you learned about wind and erosion. Go back to the text to find details that support your thinking.

You might say:

I learned _____.

I learned this information from page _____, where it says _____.

I think _____, because in the text it said _____.

4. With your partner, **discuss** your ideas for these questions:

- How did each of the two texts we read today help you understand wind erosion?
- What was different about these two texts?
