

How many tens? How many ones?

Decomposing (breaking apart) Numbers

Choose a number. Show how many tens (strips) and how many ones (cubes).

43	57	64	89	91	68	50	36	77	25
----	----	----	----	----	----	----	----	----	----

For example: I choose the number **42**. I break it into these parts: **10 + 10 + 10 + 10 + 1 + 1** (4 tens and 2 ones).

Tens and Ones Cut out units of ten and units of one.

Diagram showing ten vertical strips, each divided into ten equal horizontal sections, intended for cutting out units of ten and units of one.

Diagram showing a horizontal strip divided into ten equal vertical sections, intended for cutting out units of ten and units of one.
