

What is this report?

This report provides a summary of how your student performed on the state academic assessment, the Maine Through Year Assessment, aligned to grade-level standards.

What is the Maine Through Year Assessment?

The Maine Through Year Assessment is an assessment that adapts to your student's responses in real time to measure your student's skill level in relation to the Common Core State Standards.

Why is my child taking the Maine Through Year Assessment?

Scores on the Maine Through Year Assessment provide a measure of both achievement and growth. Educators utilize student results to inform instruction, establish supports for students, and to share information about academic growth and grade level achievement with families.

 To create a more complete understanding of what your student knows and can do in relation to grade level standards, information from this report should be used alongside additional sources, such as school assessments and classroom learning.

Achievement Levels

Well-Below State Expectations	Below State Expectations	At State Expectations	Above State Expectations
<p>On this assessment, students at this achievement level demonstrate limited understanding of the knowledge and skills necessary at this grade level, as specified in the Common Core State Standards. The students need substantial academic support to be prepared for the next grade level and to be on track for college and career readiness.</p>	<p>On this assessment, students at this achievement level demonstrate partial understanding of the knowledge and skills necessary at this grade level, as specified in the Common Core State Standards. The students need additional academic support to be prepared for the next grade level and to be on track for college and career readiness.</p>	<p>On this assessment, students at this achievement level demonstrate the knowledge and skills necessary at this grade level, as specified in the Common Core State Standards. The students are prepared for the next grade level and are on track for college and career readiness.</p>	<p>On this assessment, students at this achievement level demonstrate advanced understanding of the knowledge and skills necessary at this grade level, as specified in the Common Core State Standards. The students are well prepared for the next grade level and to be on track for college and career readiness.</p>

Overall Student Performance

Student's Reading Score

Student's Math Score

** If tested again under similar circumstances, we would expect the student's scores to fall within the the range shown by the*

Reading Instructional Area Scores

Literary Text	Informational Text	Vocabulary
Students read literary texts closely to determine key ideas and details, inferences, theme, and literary elements. Students will also analyze author's purpose, text structure, points of view, and texts with similar topics/themes.	Student read informational texts closely to determine key ideas and details, inferences, central ideas, and to summarize main ideas. Students will also analyze and compare how texts are structured, various representation of ideas, claims and supporting evidence, and author's purpose and/or point of view.	Students will focus on using context, Greek and Latin affixes, and reference materials in order to find the meaning of words, including general academic and domain-specific vocabulary. Students will interpret figurative language, understand the relationship between words, and distinguish between connotations and denotations.

Math Instructional Area Scores

Operations and Algebraic Thinking	Numbers and Operations	Measurement and Data	Geometry
Students represent and solve problems involving the four operations and build skills related to patterns. Students also gain understanding of factors, multiples, the properties of multiplication, as well as the relationship between multiplication and division.	Students compare the values of numbers and build place value understanding of whole numbers and decimals. Students also perform operations with whole numbers, fractions, and decimals to solve real-world and mathematical problems.	Students represent and interpret data. Students also solve problems involving measurement and conversion of measurements. Lastly, students understand concepts of area, perimeter, volume, and angles.	Students classify shapes by their properties and graph points on the coordinate plane to solve real-world and mathematical problems.
