# Introduction and Overview

- Who are English Learners with Disabilities?
- Identification of English Learners with Disabilities
- Supporting English Learners with Disabilities in the Classroom
- Resources

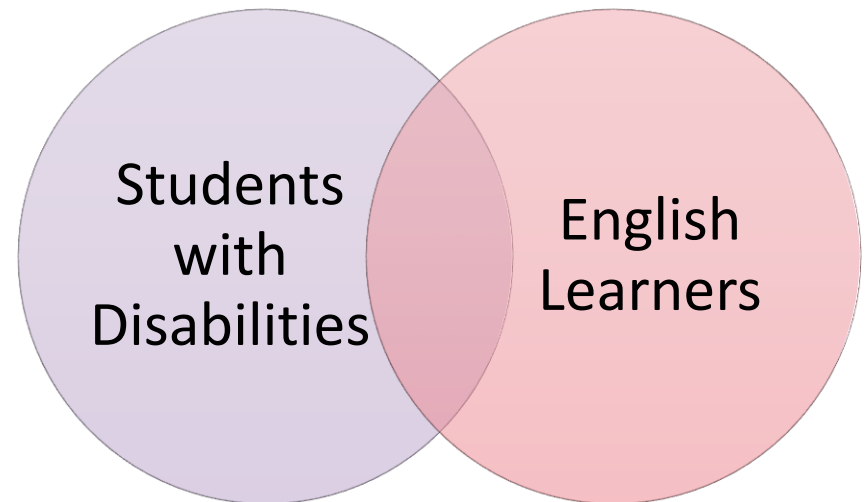

# Who are English Learners with Disabilities?

# Who are English Learners with Disabilities?

English learners with disabilities are individuals who have one or more disabilities as documented in their Individualized Education Programs (IEP), and who are progressing toward English language proficiency in speaking, reading, writing, and understanding the English language.

# Individual Characteristics Questionnaire

- Purpose: To learn more about the characteristics of English learners with significant cognitive disabilities.
- The ICQ asks for information on students' use of language including English and other languages as well as students' needs related to their disabilities.
- The ICQ does not request any personally identifiable information.
- Educators completed one ICQ for each student.
- Most surveys were completed in under 15 minutes.

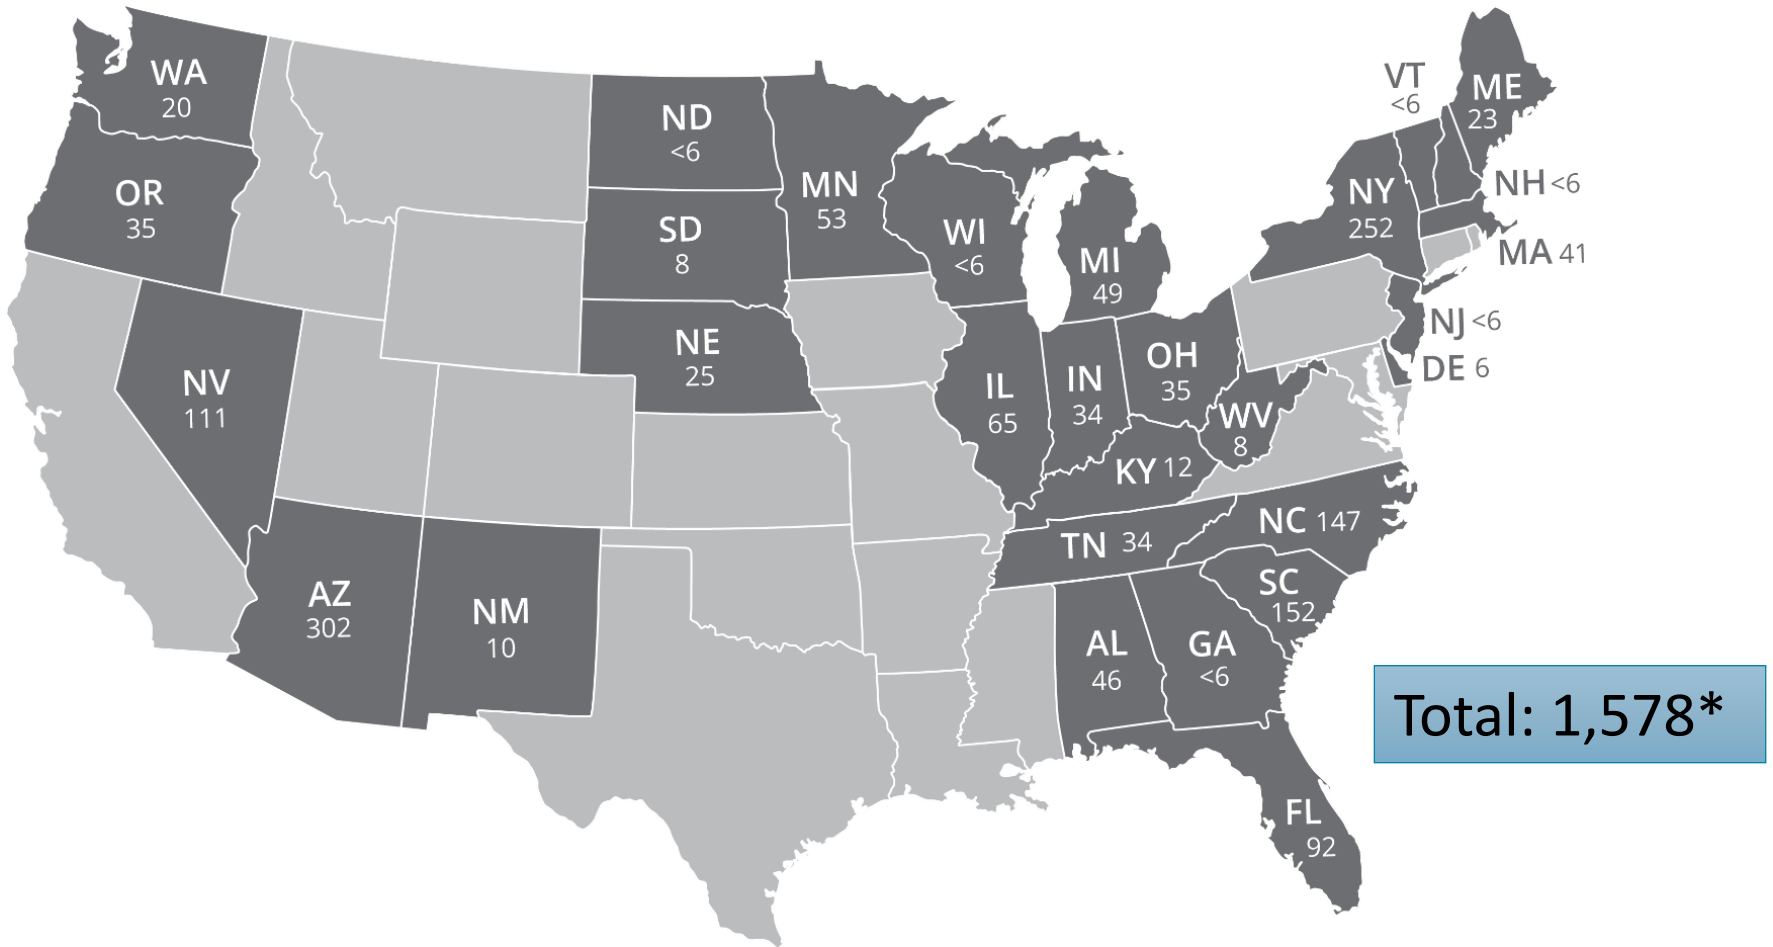

# Individual Characteristics Questionnaire

## Data Analysis

- Original analysis reported as descriptive statistics
- Results are reported in Christensen, Mitchell, Shyyan, & Ryan (2018)
- Secondary analysis provides descriptive statistics of ICQ data by primary disability categories:
  - Autism
  - Developmental Delay
  - Intellectual disability (mild, moderate, profound)
  - Multiple disabilities
  - Speech/Language Impairment
  - Other

# Individual Characteristics Questionnaire

# Primary Disability

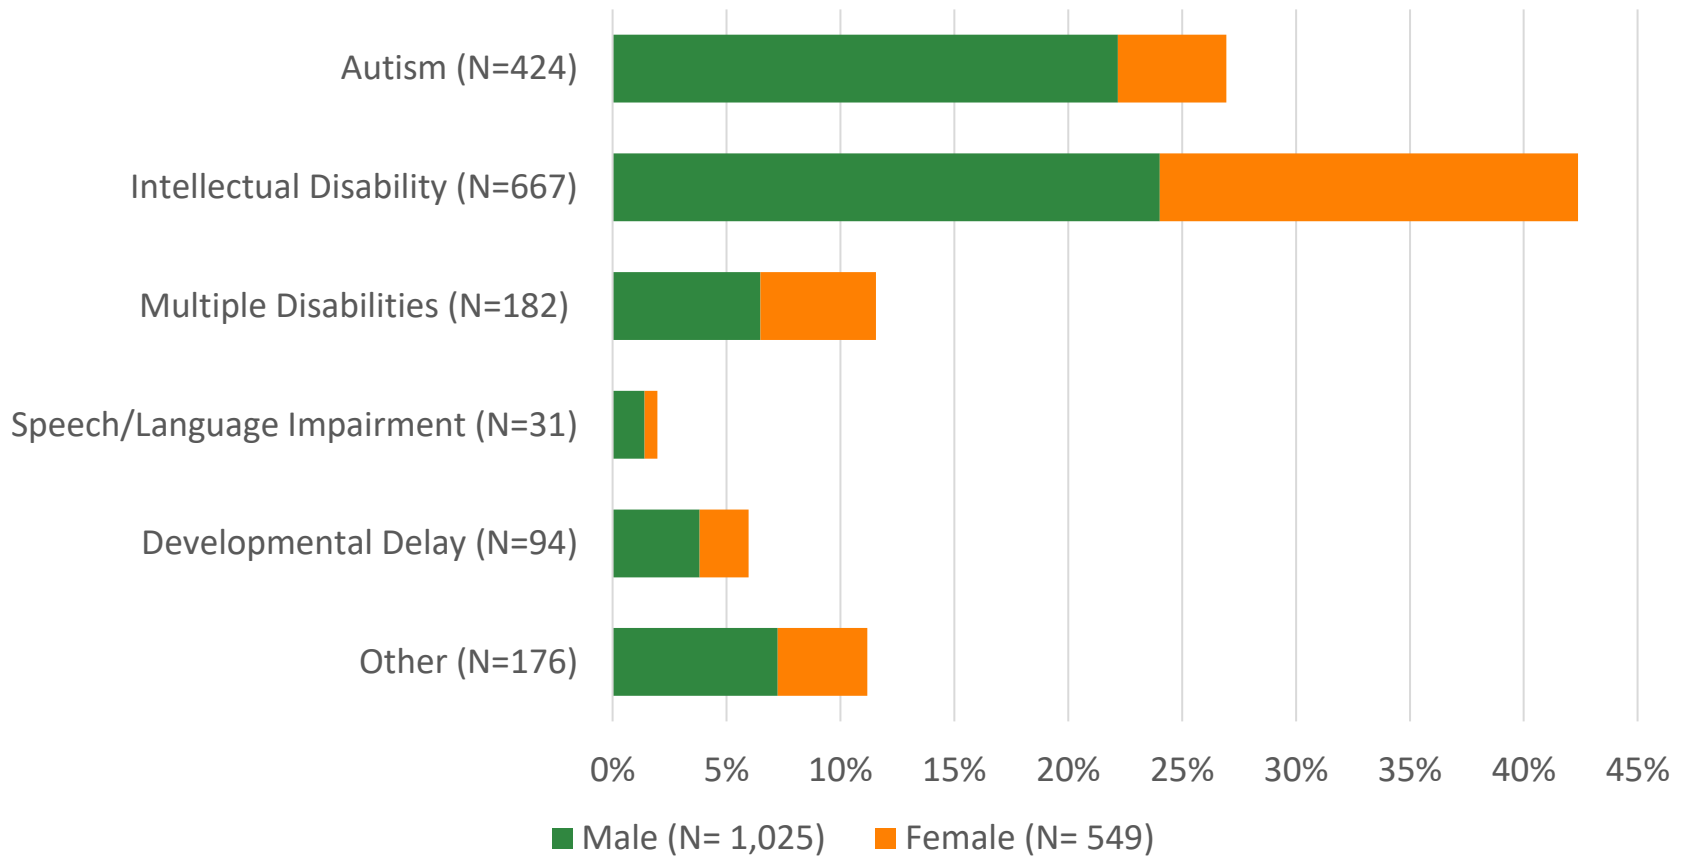

- Most students have an intellectual disability as their primary disability.
- Out of the 646 students who have a secondary disability, 186 (45.7%) have a speech/language impairment. 53 (14.9%) have an intellectual disability.

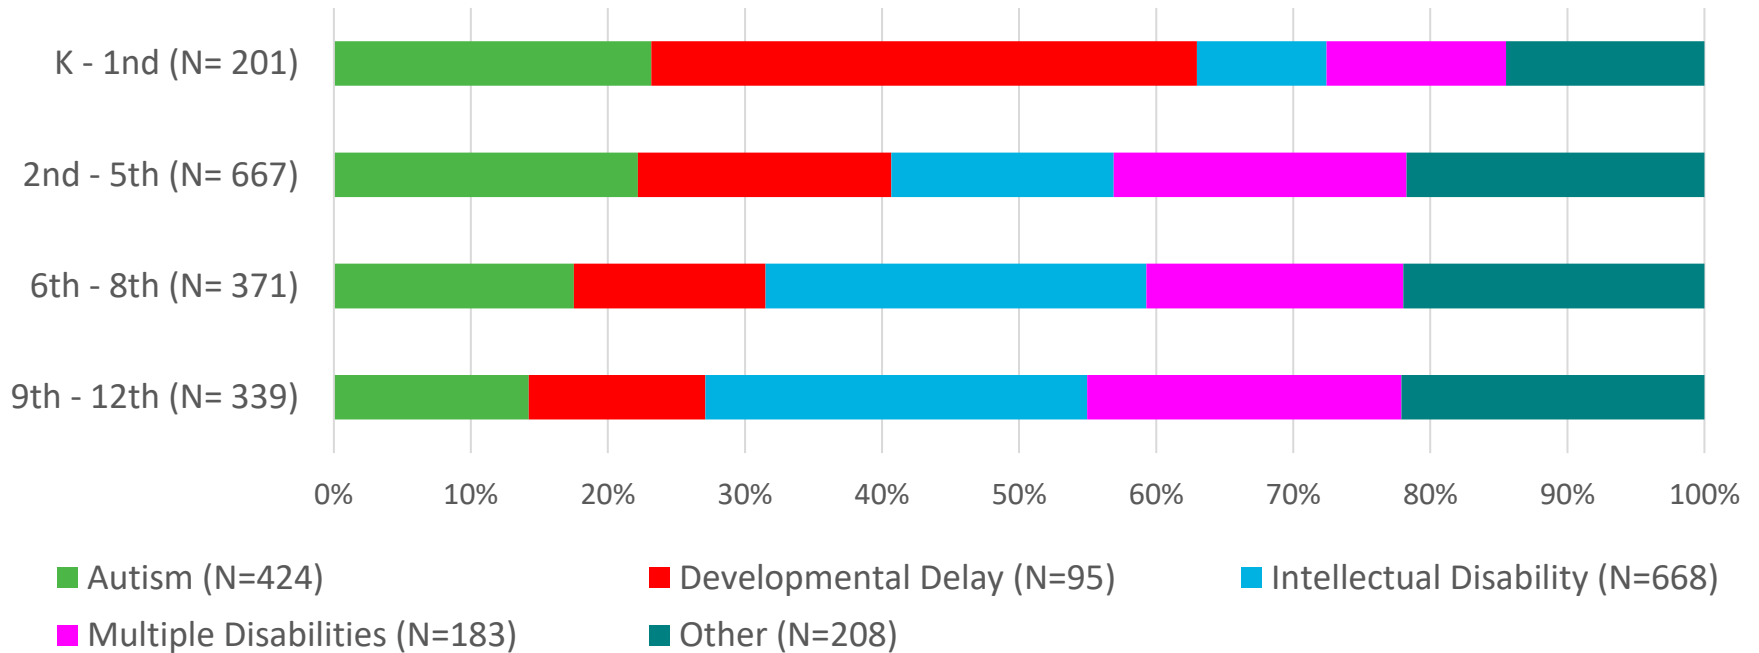

■ Autism	■ Developmental Delay
■ Intellectual Disability	■ Multiple Disabilities
■ Speech/Language Impairment	■ Other

# Primary Home Language

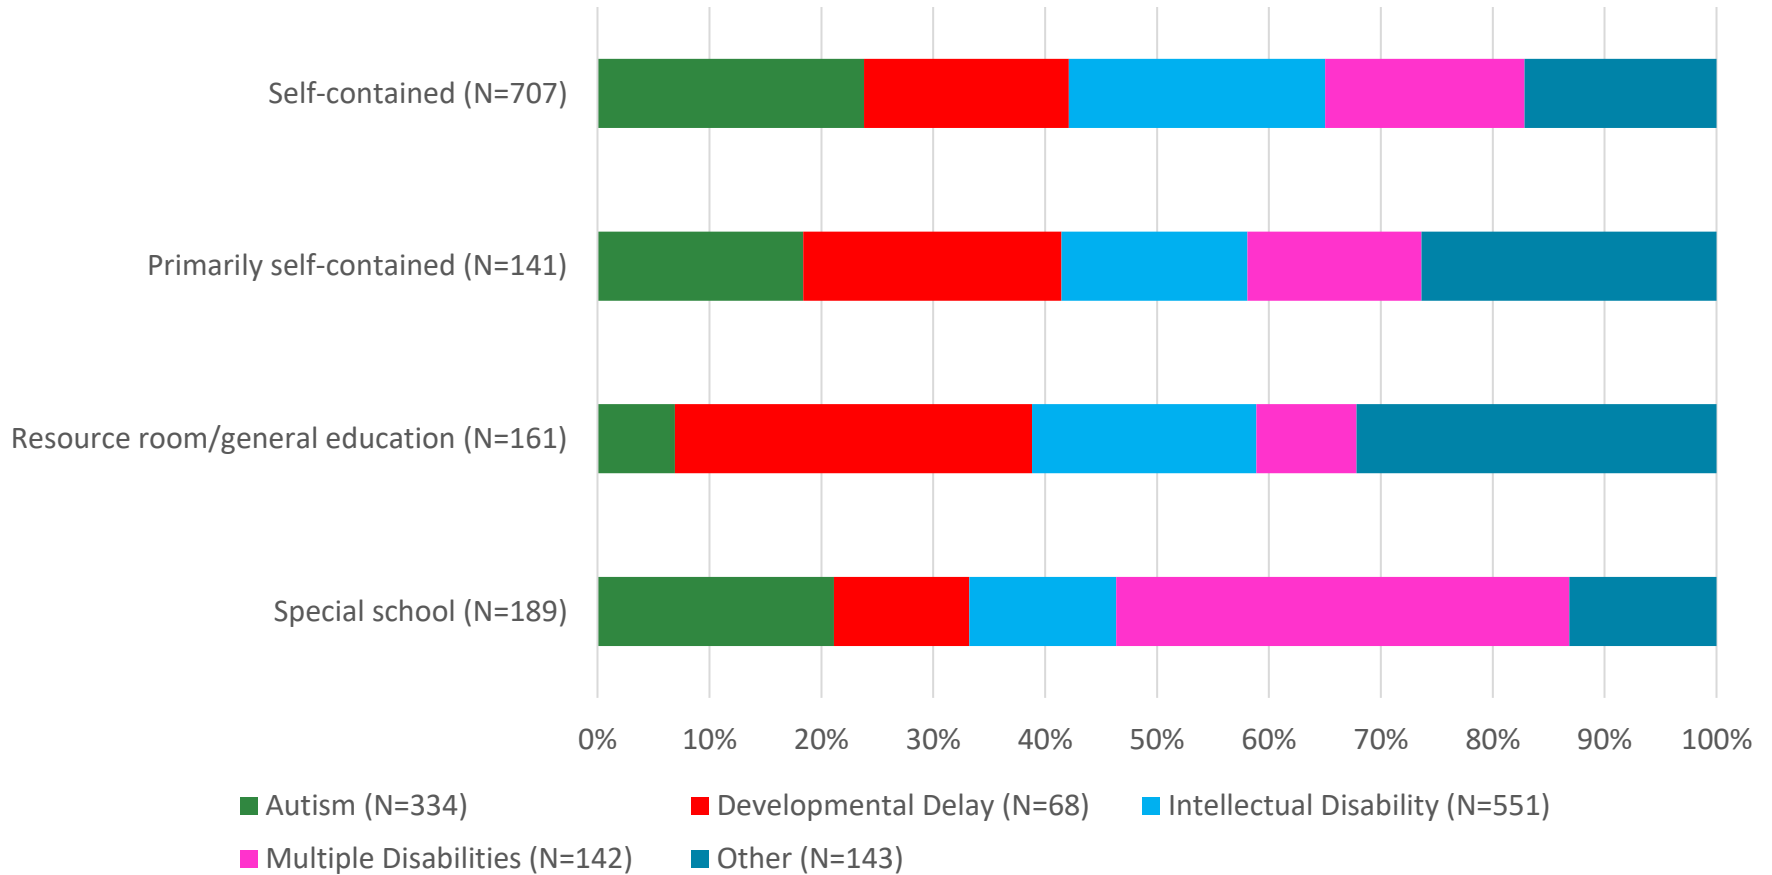

Primary Home Language	#	%
Arabic	40	2.6
English	424	27.8
French	10	0.7
Haitian Creole	14	0.9
Mandarin	19	1.2
Russian	15	1.0
Somali	14	0.9
Spanish	819	53.8
Vietnamese	10	0.7
Other	158	10.4
<b>Total</b>	<b>1,523</b>	<b>100.0</b>

- About 70 home languages represented in the student sample.
- Spanish was the most common home language for all primary disability categories (n=819; 53.8%).
- Most common other primary home languages include English (n=424, 27.8%), Arabic (n = 40; 2.6%).

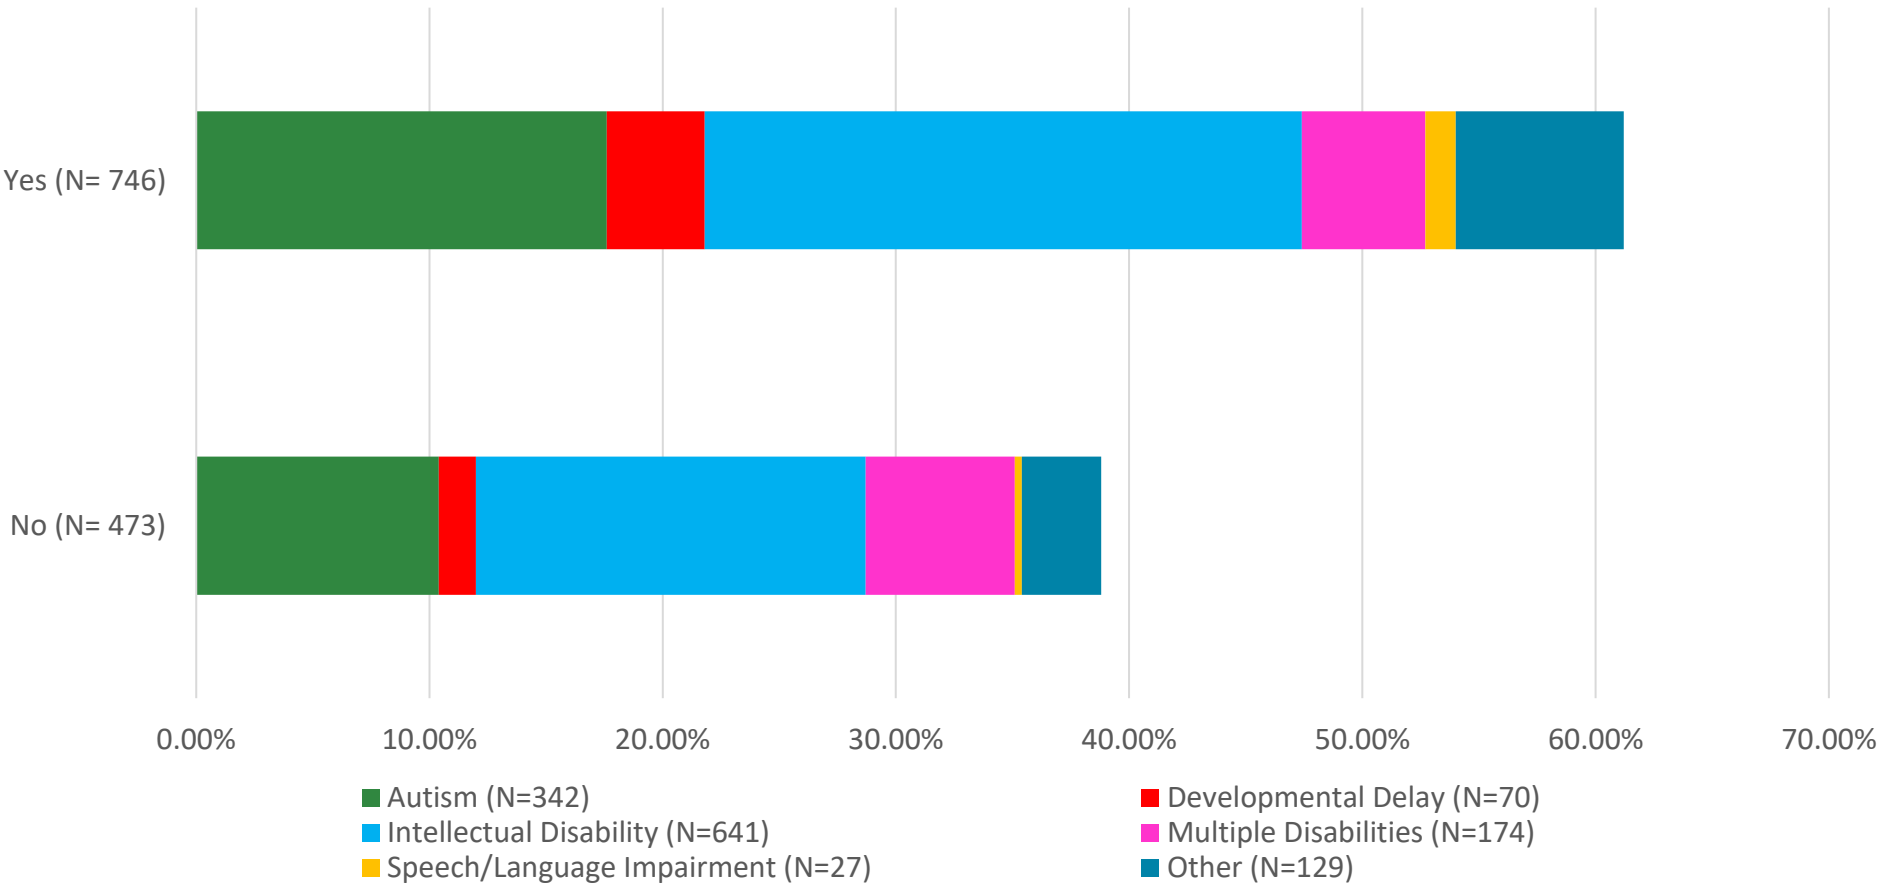

# Primary Classroom Settings

# Identifying English Learners with Disabilities

## Two Primary Identification Issues:

1. Identification of a disability in a student who is already identified as an English learner
2. Identification of English learner status in a student who is already identified as having a disability

# Identification Requires Balance!

## **Under-Identification**

Some ELs who need special education services don't receive services

## **Over-Identification**

Some ELs who do not need special education services may lose instructional time

## **Just Right!**

All ELs, including those with disabilities, get the services they need!

- Schools must identify ELs suspected of a disability in a timely manner
  - Learning disability? Language learning issues? Cultural adjustment?
  - Lack of instruction or limited proficiency in English cannot be a reason for a special education referral
  - Initial evaluation started within 45 days of referral; completed within 60 days
- Include a ESOL-endorsed teacher in the referral process

# Identification

## Questions to consider:

1. Does the EL receive standards-based content instruction?
2. Have appropriate accommodations and modifications been used and documented?
3. Has input from the student's family been gathered?
4. Other factors? (e.g., trauma, attendance, limited experience with schooling)

# Identification Considerations

## Considerations for ELs with cognitive disabilities:

- Challenges in determining EL status
- EL screeners may pose access issues
- Communication needs are critical
- Linguistic deprivation may influence both disability and linguistic identification
- Determine whether or not the student should take ACCESS or Alternate ACCESS

# Teacher Observations & Interviews

- Purpose: To learn more about the classroom-based practices and approaches teachers use in working with ELLs with significant cognitive disabilities
- Focus on strategies used to support English language development
- Inform the development of the assessment and future targeted professional development

# Instructional Setting

Instructional Setting	Number
General Education Class	1
English Language Development Class	6
Special Education Class with Non-disabled Peers	1
Special Education Class with Students with Disabilities Only	81
Related Services	2

# Importance of Language & Communication

- **Communication** is a social event that requires sending and receiving messages with shared understanding of meaning.
- **Language** is a structured and shared form of communication like spoken and written words, figures, characters, and gestures, or a combination of these.

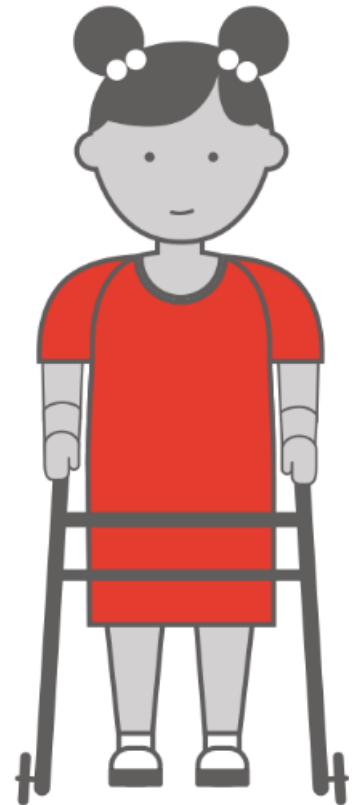

# Importance of Peer Interaction in Developing Proficiency in English

- **Peer interaction** is a critical element in the development of communication and language skills for English learners with disabilities.

## Language and Communication Application

- What are your student's communication related needs?
- What are your student's language related needs?
- How can you identify the student's proficiency in their home language?  
How can you use the student's home language and culture to support learning at school?

# Development of Alternate Can Dos

- Can Do Descriptors are examples of what students Can Do with English at each grade and performance level
- Alternate Can Do Descriptors will inform the development of new items for the revamped Alternate ACCESS and also provide instructional support materials
- Meeting held in November 2019
- 20 states represented, including WIDA and non-WIDA states
- Developed draft Can Dos that address expressive and interpretive domains

# Draft Alternate Can Do Descriptors

## Expressive 3-5 Science Alternate Can Do Descriptors

Level 1	Level 2	Level 3	Level 4	Level 5
Represent cause and effect relationships when given options.  Understand what a model is.	Show and interpret data.	Produce simple statements about cause and effect relationships in familiar contexts.	Compare items or substances using weights or measures.	Explain cause and effect relationships .  Explain a model in detail [using a variety of sentence structures].

If you are a content teacher, use the Alternate Can Dos to guide your unit

- They are designed to be applicable to multiple topics/themes and grade levels.
- While the content itself is important information, we are focusing on the language needed to access the content.

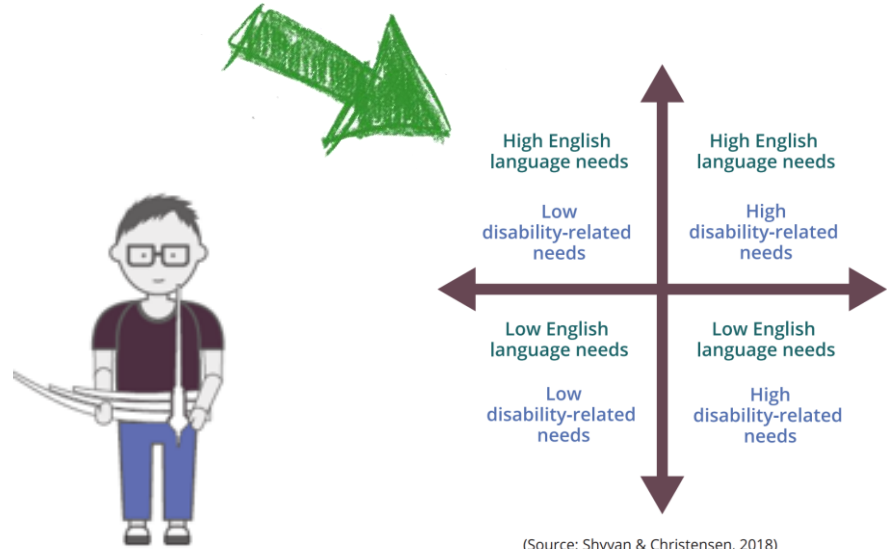

### **#3. Consult the framework while considering your students' needs.**

- *Rate their needs based on language and learning and pick an appropriate quadrant.*
- *Use the quadrant to guide your movement towards language growth using expressive and receptive markers.*

# Application to Instruction

- ▶ Develop learner profiles to determine how to best use the descriptors to guide the lesson.
- ▶ Based on the quadrant placement, focus on our main questions:
  - ▶ How will student access information?
  - ▶ How will student demonstrate understanding and show growth?

(Source: Shyyan & Christensen, 2018)

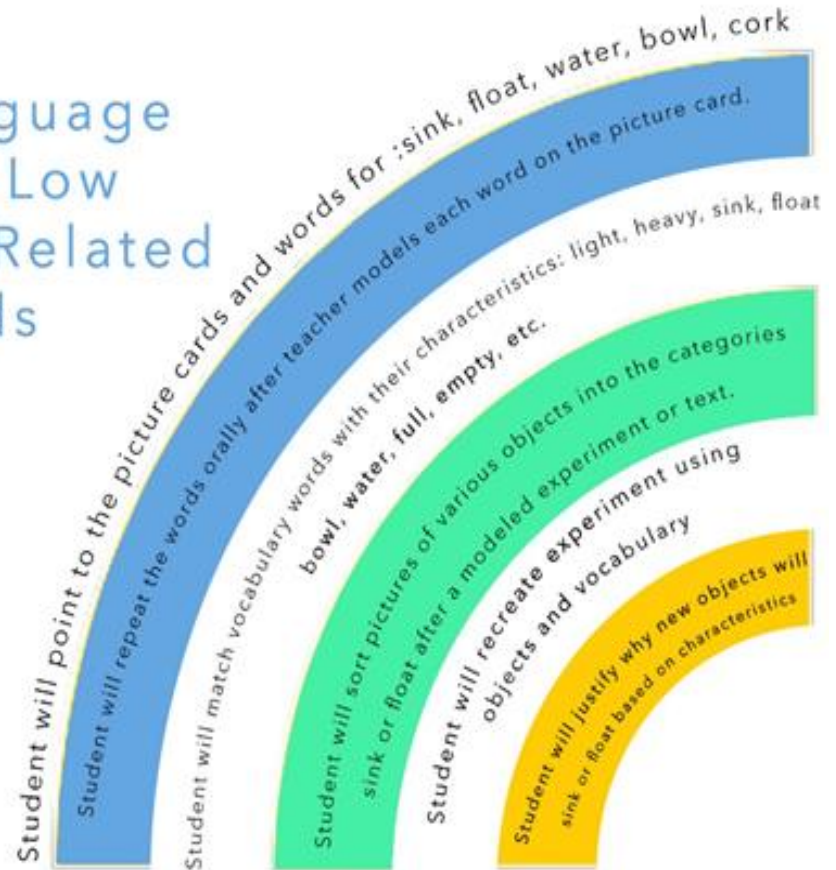

*Jorge is a 9-year-old who came from El Salvador. He was held in a detention center for 90 days. His mother reports that he struggled with paying attention and was often sent home from school early, but did not have an IEP or any equivalent education plan or accessibility supports in place. He has no physical disabilities other than some fine motor coordination challenges and articulation/speech goals. On initial assessments, the student is able to write numbers to 10, trace basic shapes and letter shapes, and can write his first name, but not his last name. He is able to identify 12 out of 26 letter sounds in Spanish. Currently, he receives instruction primarily from a Special Education teacher, but also is in a co-taught class (with regular education and ESL teacher) for a portion of the reading and writing (ELA) block.*

# Application to Instruction

Create objectives with increasing receptive and expressive language demand.

High Language Needs; Low Disability-Related Needs

What does language learning look like?

# Accommodations

Accessibility tools and accommodations are changes in materials or procedures that allow students to participate fully in instruction or assessments.

Accessibility tools and accommodations reduce the barriers caused by a student's proficiency in the language of instruction and/or a student's disability.

- Not all accessibility tools and accommodations used in the classroom may be used on assessments
- Accessibility tools and accommodations may differ on content and English language proficiency assessments
- ELs with disabilities can participate in regular ELP assessments with or without accommodations, or they can participate in alternate ELP assessments.
- Accommodations can be decided across all four domains or for a single domain.

# Final Thoughts

## English learners with disabilities CAN...

- English learners with disabilities **can** learn complex language and communication systems.
- English learners with disabilities **can** improve their measures of academic and language growth.
- English learners with disabilities **do** have specific learning needs that are different from those of other students with disabilities.
- Students who do not respond **do** understand.
- English learners with disabilities **do** benefit from English development services.
- Others?

# The Least Dangerous Assumption IS to Presume Competence!

Acting on the presumption of competence provides students with the opportunity to learn, achieve, and ultimately become more independent.

# Resources

# Resources - ALTELLA

altella.wceruw.org/index.html

ALTELLA provides research-based resources about English language proficiency assessment and learning for multilingual students with cognitive disabilities.

## Background

The Alternate English Language Learning Assessment (ALTELLA) project aims to apply lessons learned from research on successful instructional practices, accommodations, and assessing English learners (ELs) and

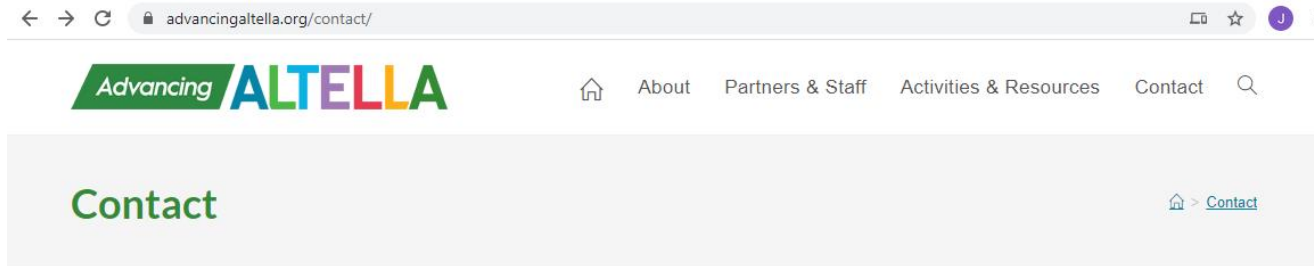

## Research Activities

ALTELLA is divided into six project activities: 1) An Individual Characteristics Questionnaire (ICQ); 2) Classroom observations and teacher interviews; 3) Standards prioritization; 4) Innovative item development; and 5)

For media inquiries, contact [news@wida.us](mailto:news@wida.us).

The Advancing ALTELLA project is housed within the [Wisconsin Center for Education Research \(WCER\)](#) at the [School of Education, University of Wisconsin-Madison](#).

## Join the Advancing ALTELLA Community

The Advancing ALTELLA Community believes that English learner students with the most significant cognitive disabilities bring a rich and varied set of skills and strengths to our classrooms. We care deeply about providing the best tools and resources for these students and the educators who work with them.

# Resources – Facebook Group

The screenshot displays the Facebook group interface for "Supporting Success for Multilingual Learners with Disabilities". The top navigation bar includes the Facebook logo, the group name, a search bar, and user profile information for "Jennifer". The group cover image features the WIDA logo (a cluster of colorful squares) and the acronym "WIDA" in large black letters. Below the logo is an illustration of six diverse students with various disabilities: a boy with a prosthetic arm, a girl with glasses and a prosthetic arm, a girl with a prosthetic arm, a girl with a walker, a boy with a prosthetic arm, and a girl with a prosthetic arm. The left sidebar contains navigation links: "Supporting Success for Multilingual Learners with Disabilities", "Public group", "About", "Discussion", "Announcements", "Members", "Events", "Photos", "Group Insights", "Watch Party", "Moderate Group", and "Group Quality". The main content area shows a "Write Post" section with options for "Photo/Video", "Live Video", and "More". Below this is a "GROUP BY" section showing the group name "WIDA" and "4,646 like this". A "POPULAR TOPICS IN POSTS" section lists "Distance Learning ...", "AAC (1)", "Individualized Edu...", and "Social Stories (0)". The "ANNOUNCEMENTS" section features a post from James Mitchell, Admin, dated June 15 at 10:57 AM, with the text "Tell us a little bit about yourself and your experience working with".
