

Proposed Carl D. Perkins 3S1 Secondary Performance Indicator Definition.

PI:	3S1 Postsecondary Placement
Perkins:	The percentage of CTE concentrators who, in the second quarter after exiting from secondary education, are in postsecondary education or advanced training, military service or a service program that receives assistance under title I of the National and Community Service Act of 1990 (42 U.S.C. 12511 et seq.), are volunteers as described in section 5(a) of the Peace Corps Act (22 U.S.C. 2504(a)), or are employed as recorded in the NEO CTE Post-Grad Placement survey.
Formula:	[# of CTE concentrators who are in the second quarter after exiting from secondary education are engaged in one of the following: -postsecondary education -advanced training -military service -volunteers within the Peace Corps Act (22 U.S.C. 2504(a)) -employed] (/) [# of CTE concentrators who exited from secondary education in the reporting year]
Example:	50/(25+10+15+25+25) 50/(100) 50%

The NEO CTE Post-Grad Placement survey is a new data compilation for MDOE-CTE since automated system data-mining is not available at this time. CTE Center/Regions will be asked to contact their CTE concentrators who, in the second quarter after exiting from secondary education, are in postsecondary education or advanced training, military service or a service program that receives assistance under title I of the National and Community Service Act of 1990 (42 U.S.C. 12511 et seq.), are volunteers as described in section 5(a) of the Peace Corps Act (22 U.S.C. 2504(a)), or are employed. The current baseline percentage was derived from historical data recalculations and projected extrapolations. MDOE-CTE will continue to seek automated services and will request a percentage modification if new methods of collection are discovered.
