

SHOULD I GET MY CHILD VACCINATED?

1 Children 5 years and older can get the Pfizer COVID-19 vaccine.

2 The COVID-19 vaccine is the best way to keep your child safe. Like other pediatric vaccines, the COVID-19 vaccine was thoroughly tested on children before being approved.

3 Although COVID-19 in children is usually milder than in adults, some kids can get very sick and have complications or long-lasting symptoms that affect their health and well-being.

4 If you have questions, talk to a school nurse or your doctor about your child and the COVID-19 vaccine.

5 The Community Vaccination Line helps Maine people quickly find a COVID-19 vaccine near you. Call 1-888-445-4111.

The vaccine is **FREE**, and your immigration status does **not** impact your ability to receive a vaccine.
