Data Collection and Submissions in Early Childhood Special Education

Presented by: OSSIE and Programming and Data Teams

Data Collections for PreK Children with Disabilities

- Child Count
- Preschool Environments (Indicator 6)
 - Percent of children attending and receiving services in specific educational environments
- Preschool Transition (Indicator 12)
 - Percent of children who received early intervention services and transitioned to early childhood special education by age three
- Child Outcomes (Indicator 7)
 - Progress of preschool age children with disabilities between entry and exit from the program on three outcome areas.

SAUs In Cohort 1 Receive Their Own Excel Spreadsheet File To Collect And Submit Data To SEA

- Student data prepopulated on the spreadsheet is based on SAU submitted data and is specific to each SAU/LEA.
- Requested data elements will be collected and tracked by the SAU/LEA over the remained of the school year.
- Data must be complete and submitted for each student enrolled.
- Securely email the spreadsheet back to the SEA by June 30, 2025.

SEA Requests Two Data Sets

Ind 12 Preschool Transition

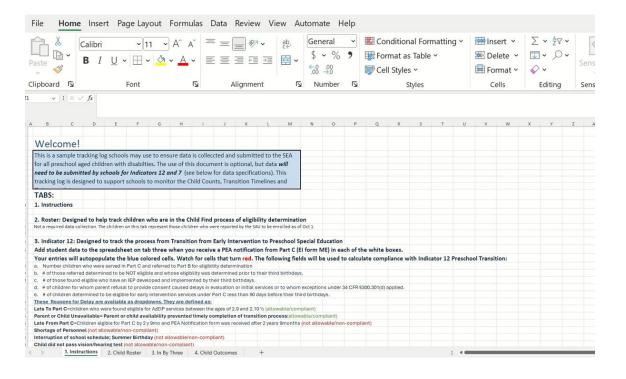

- a) Count of number of Referrals from Part C to Part B
- b) Count of number of children determined not eligible
- c) Count of eligible children with an IEP by three years old
- d) Count of children who did not have an IEP on time because of parent delay
- e) Count of children who did not have an IEP due to late referrals from EI

Ind 7 Child Outcomes

- a) Social Emotional Entry and Exit Scores and progress between entry and exit
- b) Knowledge and Skills Entry and Exit Scores and progress between entry and exit
- c) Behaviors to Meet Needs Entry and Exit Scores and progress between entry and exit

Tab 1: Instructions

The instructions tab describes the data being collected on each of the tabs of the spreadsheet.

Tab 2. Child Roster

- Prepopulated data received from the SAU on children in Cohort 1 on October 1.
- Unrelated to quarterly data collection for funding purposes.
- Not required tracking sheet.

Tab 3: Transition from Early Intervention

- Upon receipt of a referral from Early Intervention for ME record the date of referral, birthdate, Transition Conference date, date whether the child was eligible or not eligible, IEP date, reasons for delay.
- Used to calculate the percentage of children who had an IEP by three years old if they had been in Early Intervention

Tab 3: Indicator 12 Transition Data Collection and Reporting

• Five data elements are reported by tracking the referral, eligibility, and IEP dates of students transitioning from Early Intervention.

When Text Turns Red

- Late Referral: A child was receiving early intervention services prior to 2 years 9 months but was referred late to the SAU.
- Attendance at Transition Conference: SAU must attend the transition conference that is scheduled, at least 90 days and not more than 9 months before child turns three.
- Eligibility Determination Late: If a child was not determined eligible within 60 days of consent to evaluate, this date will turn red (column M).
- IEP Late: If the IEP was developed after the child turns three, this date will turn red (column P).
- Reason Child Not in By Three: If the SAU identifies a reason that is not compliant (e.g., late referral, shortage of personnel, summer birthday)

Practice Adding Data for Indicator 12

 Document the steps in the special education transition process for children in Early Intervention for ME starting with the Transition Notification. In By Three Scenarios for use with the excel data collection spreadsheet training: Use these scenarios to train practitioner teams responsible for managing the data tracking sheet.

1. Timmy "Not-Eligible" was born on October 25th, 2021. He was referred for early intervention within one month of his birth and had Early Intervention services for vision impairments, and his parents received supports to help Timmy engage with toys and household objects and develop navigation, fine, and gross motor skills. He was provided with glasses and made good progress in his El program. He was referred to the school district July 7, 2024, the parents agreed that preschool special education might be helpful. The school attended the transition conference on July 11, 2024. The school district agreed to evaluate, not sure whether the child continued to need special education to access the early learning activities or to make progress in his development. The parents provided consent to have Timmy evaluated on July 11, 2024. The district used the existing data from EI for ME regarding progress on the domains of early learning and planned to update the vision assessments with an assessment conducted by an ophthalmologist, which the district paid for. The school district and family regrouped when the assessment was complete, and the evaluation written to present the results. The eligibility determination date was 9/15/2024. The child was determined not to be eligible for special education since now his disability was corrected and there did not appear to be any need for specialized instruction. The team did not write an IEP.

Question: Will Timmy be counted towards the 100% compliance indicator for "In by three"?

2. Ricky "Late-Parent" was born on October 25, 2021. The Service Coordinator notified the district about the transition on August 25, 2024. This was after Ricky was 2 years 9 months old, so there was already a concern about how much time the district would have to conduct the assessments and determine eligibility for preschool special education. The district contacted Maine Dept of Education, Office of Special Services and Inclusive Education (OSSIE) to let them know about the late referral. The school district, recognizing the late referral, agreed to attend a Transition Conference the next day, 8/26/2024, since the EI team proposed to hold it right away. The district MET team also came to the Transition Conference meeting and they were all able to review existing data and determine whether additional assessments would be needed to determine eligibility. The EI team provided recent

- Child Outcomes Data Entry Page
 - Name, ID, Entry Date, Entry Score for Each Outcome area
 - Exit Date, Exit Score and Progress rating required for each student

Child Outcomes Data Collection Timeline

- For entry—as soon as possible upon eligibility as a preschool aged child with a disability so that the date the baseline is determined offers the maximum amount of time for development and instructional progress prior to exit.
- For exit— as close as possible prior to exiting the program either by age, or is no longer eligible, or moves a score must be determined.
- Data on all children exiting the program during the school year to be submitted to SEA by June 30, 2025.
