The NEO CTE Post-Grad Placement survey is a new data compilation for MDOE-CTE since automated data-mining is not available. CTE Schools will be asked to contact their CTE concentrators, in the second quarter after exiting from secondary education, to ascertain if the students are in postsecondary education or advanced training, military service or a service program associated with Volunteer Maine. MDOE-CTE will continue to seek automated services and will request a percentage modification if new methods of collection are discovered.
