# Determining Ounce Equivalents of Grains in Child and Adult Care Food Program Recipes 

$\circ \circ$ ○○

Grain items prepared from scratch can be a wonderful addition to Child and Adult Care Food Program (CACFP) menus. These items may count toward the minimum amount of grains required at CACFP meals and snacks, which are listed in ounce equivalents (ozeq). One ounce equivalent (ozeq) is equal to 16 grams of grains.

To determine how many oz eq of grains are in one serving of a recipe, you can:
A Complete the Homemade Grains Worksheet on page 6.
Or
Weigh one serving of the grain item. Compare the weight of the item to what's listed in the "Using Ounce Equivalents for Grains in the CACFP" worksheet at TeamNutrition.USDA.gov. You can also compare the weight of the item to what's listed in "Exhibit A: Grains Requirements for Child Nutrition Programs" at foodbuyingguide.fns.usda.gov.

## Using the Homemade Grains Worksheet

You can use the Homemade Grains Worksheet on page 6 to help determine how many oz eq of grains are in one serving of your recipe. Complete the worksheet by following the steps below:

Write the name of the recipe on the line after "Homemade Grains Worksheet." Then, list each creditable grain ingredient in the recipe. Creditable grains include whole grains, enriched grains, bran, and germ. See the Grains Conversion Chart on page 5 for a list of commonly used grain ingredients. If an ingredient in your recipe is not creditable, do not include it in the Homemade Grains Worksheet.

## Pizza Crust

Yield: 25 servings
Ingredients
$31 / 4$ cups enriched bread flour
$31 / 2$ cups whole-wheat flour
$1 / 2$ cup milk
$1 / 3$ cup sugar
1 tablespoon active dry yeast

The creditable grain ingredients in this recipe are enriched bread flour and whole-wheat flour.

## Homemade Grains Worksheet: Pizza Crust

| 1 <br> Grain Ingredient | Amount | Multiply by | 3 <br> Conversion Factor | Equals | Grams of Grains |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Enriched bread flour |  | x |  | = |  |
| Whole-wheat flour |  | x |  | = |  |

List the amount of each creditable grain ingredient in the recipe. If amounts are listed as fractions, change the amounts to decimals by using the Fractions and Decimals Chart below.

| Fractions and Decimals Chart |  | Pizza Crust |  |
| :---: | :---: | :---: | :---: |
| Fraction Equals | Decimal |  |  |
| $1 / 8 \quad=$ | 0.125 | Yield: 25 servings |  |
| $1 / 4 \quad=$ | $0.25 \leftarrow$ | Ingredients |  |
| $1 / 3=$ | 0.333 | _3 $31 / 4$ cups enriched bread flour |  |
| $3 / 8 \quad=$ | 0.375 | $31 / 2$ cups whole-wheat flour <br> $1 / 2$ cup milk <br> $1 / 3$ cup sugar |  |
| $1 / 2=$ | $0.5 \leftarrow$ |  |  |
| 5/8 = | 0.625 | 1 tablespoon active dry yeast |  |
| $2 / 3 \quad=$ | 0.667 | $4-2+5-5$ |  |
| $3 / 4 \quad=$ | 0.75 | $31 / 4$ cups $=3.25$ cups |  |
| $7 / 8=$ | 0.875 | $31 / 2$ cups $=3.5$ cups |  |
|  |  |  |  |
| Enriched bread flour | 3.25 cups | x |  |
| Whole-wheat flour | 3.5 cups | x |  |
|  |  | (5) Total Grams of Creditable Grains |  |

3If the recipe lists the amount of grain ingredients in grams (g), skip to Step 5. If amounts are listed as cups, ounces, or pounds, you will need to change these measurements to grams. To do so, use the Grains Conversion Chart on page 5 to find the conversion factor for each grain ingredient. Write the conversion factor for each grain ingredient on the worksheet. If the recipe has a creditable grain ingredient that is not listed in the chart, you will need to weigh your ingredient in grams.

Multiply the amount of the creditable grain ingredient by the conversion factor to determine grams of the ingredient. If you have weighed the ingredient, enter the weight under the "Grams of Grains" column.

Add the grams of all creditable grain ingredients to determine the total grams of creditable grains in the recipe.

| Grain Ingredient | 2 <br> Amount | Multiply by | Conversion Factor | Equals | Grams of Grains |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Enriched bread flour | 3.25 cups | x | 137 g | $=$ | 445.25 g |
| Whole-wheat flour | 3.5 cups | X | 120 g | = | 420 g |
|  |  | 5 Total Grams of Creditable Grains |  |  | 865.25 g |

$\underline{445.25}$ grams of enriched bread flour $+\underline{420}$ grams of whole-wheat flour $=$ 865.25 grams of creditable grains

Divide the total grams of creditable grains in the recipe (from Step 5) by the number of servings (yield) in the recipe. This tells you the amount of creditable grains per serving.
$\underline{\mathbf{8 6 5 . 2 5}}$ grams of creditable grains $\div \underline{\mathbf{2 5}}$ servings $=$ 34.61 grams of creditable grains per serving

7
Divide the grams of creditable grains per serving (from Step 6) by 16 grams. This tells you how many ounce equivalents of grains are in each serving.

$$
\begin{aligned}
& 34.61 \text { grams of creditable grains per serving } \div 16 \text { grams }= \\
& \underline{2.16 \mathrm{oz} \mathrm{eq} \mathrm{of} \mathrm{grains} \mathrm{per} \mathrm{serving}}
\end{aligned}
$$

If the answer in Step 7 ends in a decimal, round the number down to the nearest 0.25 oz eq of grains.

### 2.16 rounds down to $\underline{2}$.

One serving of this pizza crust provides 2 oz eq of grains.

## Grains Conversion Chart

| Ingredient | Measurement Unit | Conversion Factor |
| :---: | :---: | :---: |
| All-Purpose Flour, Enriched, Bleached and Unbleached | 1 Cup | 125 g |
| Almond Flour (Not Creditable) | - | - |
| Bread Flour, Enriched | 1 Cup | 137 g |
| Bromated Flour (Not Creditable) | - | - |
| Chia Seeds (Not Creditable as a Grain) | - | - |
