

Veterinary Science Virtual Career Development Event

FORMAT

The State FFA Farm Business Management Career Development Event will be held for individuals and teams of four and will consist of two sections: online multiple-choice general knowledge test and online calculations test. **Students need to bring calculators and blank paper to the event.**

Each individual works independently to complete the multiple-choice section and calculations test on which individual scores will be received, as well as the four individual scores of official team members being counted toward the total team score.

No notes, reference materials, cell phones or outside resources are permitted.

Practice questions for both test sections can be found in question banks at the Maine FFA website under "Forms & Resources."

The multiple-choice test section of the State FFA Veterinary Science Career Development Event is designed to test a participant's general understanding of veterinary base knowledge and practices, including animal behavior, anatomy, medications and medical interventions, among other areas. 25 minutes are allotted for students to complete the 30 multiple-choice questions of the online test. Each question is worth 2 points, for a total possible score of 60 points.

The calculations test is designed to test students on determining proper dosages and other quantities associated with appropriate animal care. 45 minutes are allotted for students to complete the 10 questions in this section. Each question is worth 4 points, for a total possible score of 40 points.

Scoring

Each individual may earn up to 100 points on the combined scores of the multiple-choice and calculations tests. Total possible team points (points from 4 official team members) are 400 points.
