Packages using express services should be sent directly to the DOT Headquarters Building, Maine Department of Transportation, 24 Child Street, Augusta. "FedEx First Overnight" delivery is suggested as the package is delivered directly to the DOT Headquarters Building, Mailroom, 24 Child Street, Augusta. Allow extra days for U.S. Postal Service Express Mail which has proven not to be reliable and sometimes does not deliver directly to the DOT Headquarters Building but instead delivers to the State of Maine Mail Distribution Center.

If a paper bid is to be mailed, the mailing address is Maine Department of Transportation, 16 State House Station, Augusta, ME 04333-0016. Allow additional working days for this mail to pass through the state mail system in addition to the US Postal Service as this mail is not delivered directly to the Department of Transportation.

NOTICE TO CONTRACTORS - PREFERRED EMPLOYEES

Sec. 1303. Public Works; minimum wage

In the employment of laborers in the construction of public works, including state highways, by the State or by persons contracting for the construction, preference must first be given to citizens of the State who are qualified to perform the work to which the employment relates and, if they can not be obtained in sufficient numbers, then to citizens of the United States. Every contract for public works construction must contain a provision for employing citizens of this State or the United States. The hourly wage and benefit rate paid to laborers employed in the construction of public works, including state highways, may not be less than the fair minimum rate as determined in accordance with section 1308. Any contractor who knowingly and willfully violates this section is subject to a fine of not less than \$250 per employee violation. Each day that any contractor employs a laborer at less than the wage and benefit minimum stipulated in this section constitutes a separate violation of this section. [1997, c. 757, §1 (amd).]

AWARD AND CONTRACTING
(Basis of Award)

Bids (quotes) are requested from Contractors desiring to perform Work removing pavement or concrete wearing surfaces from bridge decks for some MaineDOT maintenance work zones and small construction work sites between contract execution and March 31, 2023.

Bids (quotes) are requested for all 5 Regions in the state. A Bidder is not required to bid all Regions, and may bid on one or more Region(s). Bidders are not required to bid all items.

The dollar amount of this Contract does not guarantee that the Department will assign Work for any or all of the total amount.

The Department and each responsive bidder may enter into a Contract that will obligate each bidder to perform work pursuant to Assignment Letters at prices listed by the bidder in the Schedule of Items depending upon the needs of the Department and according to the following terms. Work will be assigned under these contracts according to the following process: The Contractor with the lowest bid for the particular Work (the "Assignment") will have first option to perform work pursuant to an Assignment Letter. If this Contractor is unable to accept the work, then the Department will contact the firm that submitted the next lowest bid to see if that Contractor will accept the Assignment and subsequent Contractors in ascending order of the amount of their bids, until a Contractor accepts the Assignment. Upon mutual agreement, an Assignment Letter will then be sent to the successful contractor. The Work described in this letter will become part of the Contract.

If, a Contractor fails to work when required or performs it in an unsatisfactory manner, or fails to meet other contractual requirements, the Department may issue a written warning. If the Contractor subsequently fails to work when required or performs it in an unsatisfactory manner, or fails to meet other contractual requirements, the Department reserves the right to immediately terminate the Contract by written Notice of Termination. In this event, the Department may complete the work with its own forces or enter into an Assignment Letter with another entity for the Completion of the Work, or use such other methods as in the opinion of the Department are required for to complete the Assignment. If a party under an assignment letter contract with the Department continually refuses Assignment Letter work, their contract shall be subject to termination.

SECTION 202
REMOVING STRUCTURES AND OBSTRUCTIONS
(Removing Pavement Surface)

The March 2020 Revision of the Standard Specifications, Section 202 - Removing Structures and Obstructions, subsection 202.061-Removing Pavement Surface, has been removed and replaced in its entirety by the following:

202.061 Removing Pavement Surface The equipment for removing the bituminous surface shall be a power operated milling machine or grinder capable of removing bituminous concrete pavement to the required depth, transverse cross slope, and profile grade using an automated grade and slope control system. The controls shall automatically increase or decrease the pavement removal depth as required, and readily maintain desired cross slope, to compensate for surface irregularities in the existing pavement course. The equipment shall be capable of accurately establishing profile grades by referencing from a fixed reference such as a 30-foot minimum contact ski (floating beam), 24 foot non-contact ski (floating beam) with 3 or more sensors; or 3 non-contact sensors directly affixed at the fore, mid, and aft points of the milling machine. Systems designed to incorporate a contact sensor located at the mid-point of the milling machine in lieu of the non-contact sensor will be permitted. Grade control sensors shall all be located on the same side. A single sensor, contact or otherwise, shall not be permitted unless otherwise approved by the Department.

The rotary drum shall be a minimum of 7 feet in width and utilize carbide tip tools at a minimum triple wrap configuration. The difference in height from the top of any ridge to the bottom of the groove adjacent to that ridge shall not exceed $\frac{1}{4}$ inch. The forward speed of the milling machine shall be adjusted to produce a milled surface meeting the groove spacing, groove depth, and surface tolerance requirements of this specification. The tools on the revolving cutting drum must be continually maintained and shall be replaced as warranted to provide a uniform pavement texture. The Department may evaluate the texture of the milled surface for information purposes by performing the Sand Patch test according to ASTM E 965.

The Contractor shall locate and remove all objects in the pavement through the work area that would be detrimental to the milling or grinding machine. Any structures or obstructions left within the travel lane or shoulders shall have tapers installed according to Standard Detail 202(01). The finished milled surface will be inspected before being accepted, and any deviations in the profile exceeding $\frac{1}{2}$ inch under a 16-foot string line or straightedge placed parallel to the centerline will be corrected. Any deviations in the cross slope that exceed $\frac{3}{8}$ inch under a 10-foot string line or straightedge placed transversely to the centerline will be corrected. All corrections will be made with approved methods and materials. Any areas that require corrective measures will be subject to the same acceptance tolerances. Excess material that becomes bonded to the milled surface will be removed to the Resident's satisfaction before the area is accepted.

The following is added to Section 202 - Removing Structures and Obstructions:

Method of Measurement Removing Pavement Surface and Removing Concrete Surface will be measured for payment by the square yard with no deductions made for areas occupied by existing obstructions.

Basis of Payment The square yard contract price will be full compensation for mobilizing to the site, de-mobilizing from the site, labor, supervision, cleaning of the milled surface, and all other incidentals required to complete the work. Hauling and stockpiling of the material will not be paid for directly but will be considered incidental to the milling items.
