

GENERAL NOTES
 Existing Bridge - Bridge damaged during flood of 1954. Abut #1 in place, fair shape. Abut #2 settled and moved toward Abut #1. Slab moved out of place.
 Stream - High water 1954, water over road.
 Foundation - Large boulders and gravel.
 Approaches - Surface treated gravel, good condition.
 Public Utilities - N.E.T.T.C. & C.M.P.C.

-PLAN-
 Scale 1" = 30' H

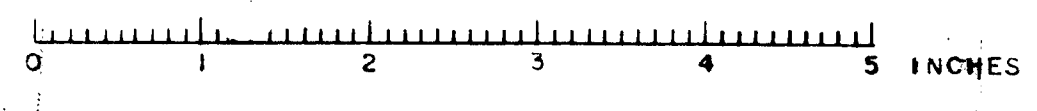

NOTES
 The structural plate pipe, fill and rip rap shall be built to the future construction & the gravel surface course, tarred, shall be built to a $\frac{1}{2}$ " of Roadway for Bridge Project to be adjusted to meet the $\frac{1}{2}$ " of the existing road at stations 372+50 and 374+50.
 Existing concrete bridge shall be broken up and removed. Remove the existing south abutment to not less than 2'-0" below subgrade or fill line as determined for future construction. Remove existing north abutment to elevation 29.0. This work shall be paid for under the items "Removal of Existing Superstructure" and "Structural Rock Excavation, Drainage".
