State WIN: 017343.00  
**Amendment No. 2**

David Bernhardt  
COMMISSIONER

Dear Sir/Ms:

The following question has been received:

**Question:** Would it be possible for the use of a Naztec TS2 Type2 controller, an equal to the proposed Eagle EPAC 300 TS2 Type 2? The Naztec Controller could replace the existing controllers at RTE 1 @ Pine Point Rd. and RTE1 @ Harlow St. and would supply a new controller and cabinet at the Payne Rd. and Route 1 intersection. The new Naztec Controllers would be compatible with the existing Traffic Signal System on Payne Rd. in Scarborough for future interconnection. Also the Naztec TS2 Type 2 Controller costs less than the Eagle EPAC 300 TS2 Type 2 Controller. The closest controller is about 1/2 mile away so interconnect would not be possible.

**Response:** No, the use of a Naztec controller will not be allowed for this project. The signal equipment and controller shall be in accordance with the construction plans and specifications.

Consider this information prior to submitting your bid on August 29, 2012.

Sincerely,

George M. A. Macdougall P.E.  
Contracts & Specifications Engineer
