Subject: **Invert Lining**
Location: **Winslow**
State Pin No: **017533.00**
Amendment No. **2**

Dear Sir/Ms:

The following questions have been received:

Question: Site visit reveals that culvert is a 6' x 9' Plate/Arch vs. a 6' round as drawn in plans. Please confirm that DOT wishes culvert to be rehabilitated to a 6' round cross section as plans suggest vs. a Plan Arch cross section as it currently is.

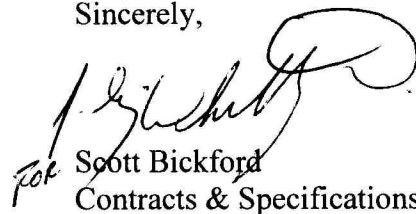

Response: The pipe is a structural plate arch 6'1" x 8'10" according to the as-builts. The intent is to line the invert of the existing structure, not to make it round as the detail shows. The detail only is representing the overall intent of the invert liner, not to make the arch round. The invert liner shall extend 3' - 0" above the invert flow line.

Question: We have located only one supplier for the invert liner, this supplier is also a bidder on the project. Are there any other suppliers?

Response: The Dept is not aware of what Suppliers there are for this product.

Consider this information prior to submitting your bid on October 5, 2011.

Sincerely,

For Scott Bickford
Contracts & Specifications Engineer
