**Amendment No. 3**

Dear Sir/Ms:

The following questions have been received:

**Question:** The details for the full depth reclaim do not match the construction notes. Can you please clarify the location of the full depth reclaim?

**Response:** It is the Departments intent to pave the trenches at 86+86 and 158+90 with 6" of 19mm HMA. The paved trenches will then be incorporated into the full depth recycle w/foam operation from 10+00 to 209+64.

**Question:** What is the final treatment for the in slopes and areas disturbed by shoulder rehabilitation?

**Response:** Final treatment of in slopes shall be the backing of pavement edges to match in slopes. Payment for final backing of pavement will be considered incidental to the paving items. Any damage or disturbance of in slopes beyond the limits of shoulder rehab operations are addressed by note 12 of the general notes.

Consider this information prior to submitting your bid on April 13, 2011.

Sincerely,

Scott Bickford
