COMMISSIONER

April 4, 2025  
Subject: AWOS Navigation Aids  
WIN: 018717.08  
Location: **Princeton**  
**Amendment No. 2**

Dear Sir/Ms.:

The following questions have been received:

**Question:** Are Frangible or collapsible couplings required for the Power or AWOS Equipment support racks?

**Response:** Frangible couplings are not required. All equipment is outside of protected object free areas and safety areas

**Question:** What is the "Class" of the Traffic Rated junction boxes?

**Response:** Junction boxes shall be rated for AASHTO **H10 loading**.

**Question:** Specifications call for 22kAIC rated panels at equipment racks. In Princeton, the upstream protective devices are only 10kAIC rated. Is a 10kAIC rating at the Equipment rack acceptable?

**Response:** For PNN, 10kAIC at the equipment rack is acceptable based on the upstream source power ratings.

Consider these changes and information prior to submitting your bid on **April 9, 2025**.

Sincerely,

A handwritten signature in blue ink that reads "George Macdougall".
