

STATE OF MAINE
DEPARTMENT OF TRANSPORTATION
16 STATE HOUSE STATION
AUGUSTA, MAINE 04333-0016

Paul R. LePage
GOVERNOR

David Bernhardt
COMMISSIONER

April 3, 2018
Subject: Maintenance & Operations
Building
State WINs: 021942.02 & 022998.00
Location: **Portland**
Amendment No. 1

Dear Sir/Ms.:

Please make the following changes to the Bid Documents:

In the Bid Book:

CHANGE on page 14 "NOTICE TO CONTRACTORS", the bid opening date in the first paragraph from "April 11, 2018" to read "**April 18, 2018**". Make this change in pen and ink.

CHANGE on page 14 "NOTICE TO CONTRACTORS", the Mandatory pre-bid meeting date in the fifth paragraph from "April 4, 2018" to read "**April 11, 2018**". Make this change in pen and ink.

CHANGE on page 50 "SPECIAL PROVISION – SECTION 102 – Bidding – (Pre-Bid Meeting)", the Mandatory pre-bid meeting date in the first paragraph from "April 4, 2018" to read "**April 11, 2018**". Make this change in pen and ink.

REMOVE pages 17 – 24, Proposal Schedule of Items, 8 pages, dated 3/6/2018, and **REPLACE** with the attached, revised Proposal Schedule of Items, 8 pages, dated 4/2/2018.

The following questions have been received:

Question: Please clarify where Item 403.209 is to be used.

Response: Item 403.209 is included in the contract for discretionary use as directed by the Resident.

Question: Please verify that the quantity for Item 409.15 is correct.

Response: The correct quantity for Item 409.15 is 200 Gallons. See revised Schedule of Items.

PRINTED ON RECYCLED PAPER

Question: A5.3, detail 2, indicates 16 oz. copper flashing at wall bottom. Div. 7, Section 076200 does not have any information for copper flashing. Is standard roofing copper acceptable?

Response: Yes. Standard Roofing Copper is acceptable.

Question: Same detail also indicates "Felt paper" behind the granite panels. I cannot locate any specifications for this product. Is 15# felt acceptable?

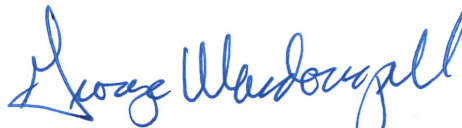

Response: Yes. 15# Felt is acceptable.

Question: S3.1, detail "Typ. HSS Jamb Col to CMU Conn" indicates welding a hooked strap anchor every 8". This may not be practical since rebar is normally placed first and CMU fit over which means anchors would need to be welded on after each block is placed. Would an H&B #359C weld on anchor with H&B #301 anchors be acceptable? These products are designed for columns and can be welded on prior to CMU installation. Please advise.

Response: The proposed H&B anchors are not acceptable. In lieu of field welding, a "U" or "Z" strap anchor with (1) #12 TEKS self-drilling screw is acceptable.

Consider these changes and information prior to submitting your bid on **April 18, 2018**.

Sincerely,

George M. A. Macdougall P.E.
Contracts & Specifications Engineer
