Subject: Placement of Plant Mix Recycled
Asphalt Pavement & HMA Overlay with
Drainage & Safety Improvements
State WINs: 022581.10 & 022581.55
Location: **Newburgh & Hampden**
Amendment No. 1

Dear Sir/Ms.:

The following questions have been received:

Question: In the Construction Notes on page 38 for the hourly rental 629.05, 631 Items it states there are approximately 38 driveway pipes to add/replace and 48 driveway pipes to remove and reset. The number of hours of 629.05 Hand Labor and 631.12 APE seems low for number of pipes plus any other cleanup work associated with these items. Is this an accurate number of driveway pipes?

Response: The approximate number of driveway pipes is a worse case scenario. Depending on actual field conditions and production the quantity of Hourly Rental Items will be adjusted by the Resident.

Question: Special Provision Section 105 mentions In Stream Work. Will cofferdams be required for this work? Will pay items be added for cofferdams?

Response: The In Stream Work referenced in the SP 105 will be completed by MaineDOT Maintenance and Operations prior to the beginning of the project therefore no cofferdams will be required by the Contractor.

Question: Will Special Provision Section 203 Excavation and Embankment (Dredge Materials) on pg 62 be used on this contract? Is there an item for this?

Response: The Dredge Material referenced in SP 203 will be handled by MaineDOT Maintenance and Operations who will replace the referenced cross culvert (XC-213762) prior to the project.

Question: Where will the pugmill be located so a material haul can be accurately calculated?

Response: The Pugmill will be located at the Plymouth MaineDOT Maintenance Lot at 2496 Moosehead Trail, Plymouth ME 04969.

Consider these changes and information prior to submitting your bid on **March 9, 2022**.

Sincerely,

George M. A. Macdougall P.E.
